Carlos Luna-Peña

Computer Science @ Texas A&M University
carlunpen@tamu.edu | github.com/clmoon2 | linkedin.com/in/carlunpen

Education

Texas A&M University — College Station, TX
Bachelor of Science in Computer Science; GPA: 3.8/4.0 — *May 2026*

- Relevant Coursework: Software Engineering, Algorithms, Operating Systems, AI
- Completed writing-intensive coursework including specifications, user stories, and retrospectives.

Experience

AIPHRODITE — College Station, TX
Technical Lead & Full Stack / ML — *Sep. 2024 – Present*

- Architected FastAPI backend serving computer vision embeddings and outfit recommendations to 500+ wardrobe items, reducing query latency by 40%.
- Developed RAG-powered AI fashion advisor using LangChain and OpenAI embeddings, enhancing natural language interaction capabilities.
- Led 6-person engineering team building Next.js/React frontend with Tailwind CSS, integrating real-time outfit recommendations via FastAPI backend.

applyeasy.tech — College Station, TX
Founder & Full-Stack Developer — *January 2024 – Present*

- Built end-to-end job application automation pipeline using n8n, processing 100+ jobs/day and reducing manual application time by 75%.
- Designed fault-tolerant workflow orchestration with conditional branching and retry logic, minimizing failures by 90%.
- Founded applyeasy.tech, a SaaS platform automating job applications, leveraging AI-powered filtering and resume generation.

Projects

carlosOS – Custom Unix Shell | *C, Linux, Systems Programming* — October 2024

- Implemented x86 bootloader and kernel with custom memory management and system call interface; developed using C/C++ with QEMU.
- Built userland shell supporting pipelines, I/O redirection, and background job control; documented build system for cross-compilation.

Aggie Events | *TypeScript, Next.js, React, Node.js, PostgreSQL* — March 2024

- Built full-stack event discovery platform with responsive Next.js frontend and Node.js API, serving campus organizations.
- Extended PostgreSQL schema and added composite indexes, reducing p95 query latency by 40%.

ApplyEasy Job Automation Engine | *n8n, OpenAI API, Apify, LaTeX* — 2025

- Architected core automation engine for applyeasy.tech, orchestrating job scraping, LLM-based filtering, and resume generation.
- Designed LaTeX resume template system with JSON configuration for seamless PDF compilation and delivery.

Technical Skills

Languages: Python, TypeScript, JavaScript, C/C++, Java, SQL
Frameworks: React, Next.js, FastAPI, Node.js, LangChain
Databases & Tools: PostgreSQL, Docker, Git, GitHub Actions, Linux
