Carlos Luna-Peña

Computer Science @ Texas A&M University
carlunpen@tamu.edu | github.com/clmoon2 | linkedin.com/in/carlunpen

Education

Texas A&M University — College Station, TX
Bachelor of Science in Computer Science; GPA: 3.8/4.0 — *May 2026*

- Relevant Coursework: Software Engineering, Algorithms, Operating Systems, AI
- Completed writing-intensive coursework including specifications, user stories, retrospectives, demos, and peer evaluations.

Experience

AIPHRODITE — College Station, TX
Technical Lead & Full Stack / ML — *Sep. 2024 – Present*

- Led 6-person engineering team building Next.js/React frontend with Tailwind CSS; integrated real-time outfit recommendations via FastAPI backend and PostgreSQL.
- Developed RAG-powered AI fashion advisor using LangChain and OpenAI embeddings over 500+ wardrobe items; improved recommendation click-through rate by 25%.
- Architected FastAPI backend serving computer vision embeddings and recommendations; reduced query latency by 40% with optimized PostgreSQL schema.

applyeasy.tech — Remote
Founder & Full-Stack Developer — *January 2025 – Present*

- Built end-to-end job application automation pipeline using n8n: scrapes 100+ jobs/day, filters with OpenAI, generates tailored LaTeX resumes, and sends personalized outreach emails.
- Founded applyeasy.tech, a SaaS platform automating job applications, reducing manual application time by 75%.
- Implemented GPT-powered job relevance scoring using OpenAI API; designed prompts for accurate role filtering based on user preferences.

Projects

carlosOS – Custom Unix Shell | *C, Linux, Systems Programming* — October 2024

- Implemented Unix-style shell with process management, pipelines, and I/O redirection; applied concepts from computer systems coursework.
- Built educational operating system from scratch: bootloader, kernel, process scheduler, and system calls; tested with QEMU and GDB.

Aggie Events | *TypeScript, Next.js, React, Node.js, PostgreSQL* — Date

- Built full-stack event discovery platform with responsive Next.js frontend and Node.js API; served campus organizations and students.
- Extended PostgreSQL schema and added composite indexes, reducing p95 query latency by 40%.

ApplyEasy Job Automation Engine | *n8n, OpenAI API, LaTeX* — Date

- Architected core automation engine for applyeasy.tech: orchestrated job scraping, LLM-based filtering, LaTeX resume generation, and email outreach.
- Implemented reliable data pipelines with structured error handling, processing 100+ job postings daily.

Technical Skills

Languages: TypeScript, JavaScript, Python, C/C++, Java, SQL
Frameworks: React, Next.js, FastAPI, Node.js, LangChain
Databases & Tools: PostgreSQL, Docker, Git, GitHub Actions, Linux
