Education

Texas A&M University College Station, TX
Bachelor of Science in Computer Science; GPA: 3.8/4.0 *May 2026*

- Relevant Coursework: Software Engineering, Algorithms, Operating Systems, AI
- Completed writing-intensive coursework including specifications, user stories, retrospectives, demos, and peer evaluations.

Experience

AIPHRODITE College Station, TX
Technical Lead & Full Stack / ML *Sep. 2024 – Present*

- Architected FastAPI backend serving computer vision embeddings and outfit recommendations for 500+ wardrobe items; designed PostgreSQL schema reducing query latency by 40%.
- Developed AI fashion advisor using LangChain and OpenAI embeddings, improving click-through rate on recommendations by 25%.
- Led 6-person team building Next.js/React frontend with Tailwind CSS; integrated real-time outfit recommendations via FastAPI backend.

applyeasy.tech Remote
Founder & Full-Stack Developer *January 2024 – Present*

- Built job application automation pipeline using n8n: scrapes 100+ jobs/day, filters with OpenAI, generates tailored LaTeX resumes, and sends personalized emails.
- Founded applyeasy.tech, automating job applications and reducing manual time by 75%; integrated Google APIs for document generation.
- Implemented GPT-powered job relevance scoring using OpenAI API, enhancing role matching and application effectiveness.

Projects

carlosOS – Custom Unix Shell | *C, Linux, Systems Programming* October 2024

- Implemented Unix-style shell with process management, pipelines, and I/O redirection; developed in C/C++.
- Designed basic process model with round-robin scheduler and IPC mechanisms.

Aggie Events | *TypeScript, Next.js, React, Tailwind CSS, Node.js, PostgreSQL* 2024

- Built event discovery platform with responsive Next.js frontend and Node.js API; served campus organizations and students.
- Extended PostgreSQL schema, reducing p95 query latency by 40% with optimized indexes.

ApplyEasy Job Automation Engine | *n8n, OpenAI API, Apify, Google APIs, GitHub, LaTeX* 2025

- Architected core automation engine: job scraping, LLM-based filtering, LaTeX resume generation, and email outreach.
- Implemented reliable data pipelines processing 100+ job postings daily with structured error handling.

Technical Skills

Languages: Python, TypeScript, JavaScript, C/C++, Java, SQL
Frameworks: React, Next.js, FastAPI, Node.js, LangChain
Databases & Tools: PostgreSQL, Docker, Git, GitHub Actions, Linux
