Carlos Luna-Peña

Computer Science @ Texas A&M

carlunpen@gmail.com | github.com/clmoon2 | linkedin.com/in/carlos-luna | applyeasy.tech

Education

Texas A&M University — College Station, TX
B.S. in Computer Science; Major GPA: 3.62/4.00 — *Aug. 2023 – Present*

- Relevant Coursework: Software Engineering, Algorithms, Operating Systems, Artificial Intelligence, Computer Security, Data Structures.
- Completed writing-intensive coursework including specs, user stories, retrospectives, demos, and peer reviews.

Experience

AIPHRODITE (Aggies Create) — College Station, TX
Technical Lead & Full Stack / ML Engineer — *Sep. 2024 – Present*

- Built RESTful API endpoints in FastAPI for image tagging using OpenAI and Hugging Face; classified 500+ wardrobe items with 87% accuracy.
- Led 6-person engineering team using Agile practices; reduced PR rework by 35% through daily standups and code reviews.
- Containerized backend services with Docker and configured GitHub Actions CI/CD pipeline for automated testing and deployment.

applyeasy.tech — Remote
Founder & Full-Stack / Automation Engineer — *2025*

- Built full-stack SaaS automating 100+ job applications/day using n8n, Apify, LaTeX resume generation, and OpenAI-powered role filtering.
- Integrated Google Slides, Sheets, and Gmail APIs for dynamic resume creation and email delivery; reduced manual application time by 75%.
- Deployed React Native app for mobile role review and submission tracking; iterated features based on feedback from early users.

Projects

carlosOS — C, C++, x86 Assembly, QEMU, GDB, Make — Educational Operating System

- Building kernel from scratch: bootloader, process scheduler, memory management, and system call interface; debugging via QEMU and GDB.
- Implemented Unix-style shell with process control, pipelines (pipe/dup2), and I/O redirection; built reproducible cross-compilation toolchain.

Aggie Events — TypeScript, Next.js, React, Tailwind CSS, Node.js, PostgreSQL, Docker — Campus Event Platform

- Built full-stack event discovery tool for students with 8-person team; reduced p95 query latency by 40% via optimized PostgreSQL schema.
- Implemented Google OAuth for secure auth; configured CI/CD pipeline with GitHub Actions for automated linting and testing.

ApplyEasy Job Engine — n8n, OpenAI API, LaTeX, Google APIs, GitHub — Job Automation Pipeline

- Orchestrated job scraping, GPT-based filtering, LaTeX resume generation, and personalized outreach via n8n automations.
- Processed 100+ jobs/day with structured logging and retry logic; hosted compiled PDFs on GitHub for seamless delivery.

Technical Skills

Languages: TypeScript, Python, JavaScript, Java, C++, C, SQL, Bash
Frameworks/Libraries: React.js, Next.js, Node.js, FastAPI, React Native, Tailwind CSS, LangChain
Databases: PostgreSQL, SQLite, Prisma ORM
Tools/Platforms: Git, GitHub, Docker, GitHub Actions, n8n, Apify, Linux, LaTeX, QEMU, GDB, OpenAI API, Google Slides API, Gmail API, RESTful APIs, CI/CD, Agile
