

# Carlos Luna-Peña

Computer Science @ Texas A&M University  
carlunpen@tamu.edu | github.com/clmoon2 | linkedin.com/in/carlunpen

## EDUCATION

### Texas A&M University

College Station, TX

*Bachelor of Science in Computer Science; GPA: 3.8/4.0*

*May 2026*

- Relevant Coursework: Software Engineering, Algorithms, Operating Systems, AI
- Completed writing-intensive coursework including specifications, user stories, retrospectives, and demos.

## EXPERIENCE

### AIPHRODITE

College Station, TX

*Technical Lead & Full Stack / ML*

*Sep. 2024 – Present*

- Developed RAG-powered AI fashion advisor using LangChain and OpenAI embeddings, enhancing personalization across 500+ wardrobe items.
- Built RESTful API endpoints for image tagging, achieving 87% classification accuracy, and designed PostgreSQL schema reducing query latency by 40%.
- Led a 6-person team through Agile sprints, optimizing development workflows and reducing PR rework by 35%.

### applyeasy.tech

College Station, TX

*Founder & Full-Stack Developer*

*January 2024 – Present*

- Built an end-to-end job application automation pipeline with n8n, reducing manual application time by 75% for early users.
- Implemented GPT-powered job relevance scoring using OpenAI API, optimizing role filtering and resume tailoring.
- Integrated Google Workspace APIs for seamless document generation and email outreach, enhancing user engagement.

## PROJECTS

### carlosOS – Custom Unix Shell | C, Linux, Systems Programming

October 2024

- Implemented a minimal x86 bootloader and kernel, focusing on memory management and process scheduling in C/C++.
- Designed a Unix-style shell with process management, pipelines, and I/O redirection, applying core OS concepts.

### Aggie Events | Next.js, React, Tailwind CSS, Node.js, PostgreSQL

April 2024

- Built a full-stack event discovery platform with a responsive Next.js frontend and optimized PostgreSQL schema, reducing query latency by 40%.
- Implemented Google OAuth authentication with secure session management and environment-based secrets.

### ApplyEasy Job Automation Engine | n8n, OpenAI API, Google APIs, GitHub, LaTeX

January 2025

- Architected core automation engine orchestrating job scraping, LLM-based filtering, and LaTeX resume generation.
- Implemented reliable data pipelines processing 100+ job postings daily with structured error handling.

## TECHNICAL SKILLS

**Languages:** Python, TypeScript, JavaScript, C/C++, Java, SQL

**Frameworks:** React, Next.js, FastAPI, Node.js, LangChain

**Databases & Tools:** PostgreSQL, Docker, Git, GitHub Actions, Linux
