EDUCATION

Texas A&M University

College Station, TX

Bachelor of Science in Computer Science; GPA: 3.8/4.0

May 2026

- Relevant Coursework: Software Engineering, Algorithms, Operating Systems, AI
- Completed writing-intensive coursework including specifications and peer evaluations

EXPERIENCE

AIPHRODITE

College Station, TX

Technical Lead & Full Stack / ML

Sep. 2024 – Present

- Led a 6-person engineering team to build a Next.js and React.js frontend integrated with a FastAPI backend, enhancing real-time outfit recommendations.
- Developed AI fashion advisor with LangChain using OpenAI embeddings, achieving a 25% improvement in recommendation click-through rates.
- Architected a FastAPI backend serving computer vision embeddings for 500+ wardrobe items, reducing query latency by 40% with optimized PostgreSQL schema.

applyeasy.tech

Remote

Founder & Full-Stack Developer

January 2024 – Present

- Built an end-to-end job application automation pipeline with n8n, processing 100+ jobs daily and reducing manual application time by 75%.
- Integrated Google Workspace APIs for automated document generation, enhancing workflow efficiency with structured logging and retry logic.
- Developed a React Native mobile app for real-time job application monitoring, improving user interaction and satisfaction.

PROJECTS

carlosOS – Custom Unix Shell | C, Linux, Systems Programming

October 2024

- Implemented a Unix-style shell with process management, I/O redirection, and job control, enhancing system programming skills.
- Developed a kernel with custom memory management and process scheduling, testing with QEMU and GDB for robust performance.

Aggie Events | TypeScript, Next.js, React, PostgreSQL

March 2025

- Built a full-stack event discovery platform with secure Google OAuth authentication.
- Optimized PostgreSQL schema, reducing query latency by 40% and improving user experience.

ApplyEasy Job Automation Engine | n8n, OpenAI API, LaTeX

February 2025

- Architected a job automation engine using n8n for scraping and filtering job postings, enhancing efficiency.
- Designed LaTeX resume templates for tailored PDF generation, optimizing document delivery through GitHub.

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, C/C++, Java, SQL

Frameworks: React, Next.js, FastAPI, Node.js, LangChain

Databases & Tools: PostgreSQL, Docker, Git, GitHub Actions, Linux
