EDUCATION

Texas A&M University

College Station, TX

Bachelor of Science in Computer Science; GPA: 3.8/4.0

May 2026

- Relevant Coursework: Software Engineering, Algorithms, Operating Systems, AI
- Completed writing-intensive coursework including specifications, user stories, retrospectives, demos, and peer evaluations.

EXPERIENCE

AIPHRODITE

College Station, TX

Technical Lead & Full Stack / ML

Sep. 2024 – Present

- Architected FastAPI backend serving computer vision embeddings and outfit recommendations to 500+ wardrobe items; designed PostgreSQL schema with composite indexes reducing query latency by 40%.
- Developed RAG-powered AI fashion advisor using LangChain and OpenAI embeddings; improved click-through rate on recommendations by 25% in prototype testing.
- Led 6-person engineering team building Next.js/React frontend with Tailwind CSS; integrated real-time outfit recommendations via FastAPI backend and PostgreSQL.

applyeasy.tech

College Station, TX

Founder & Full-Stack Developer

January 2024 – Present

- Built end-to-end job application automation pipeline using n8n: scrapes 100+ jobs/day, filters with OpenAI, generates tailored LaTeX resumes, and sends personalized outreach emails.
- Founded a SaaS platform automating job applications, reducing manual application time by 75%; implemented React Native mobile companion app for real-time application status monitoring.
- Integrated Google APIs for automated document generation and email sequences; hosted compiled PDFs on GitHub for reliable delivery.

PROJECTS

carlosOS – Custom Unix Shell | C, Linux, Systems Programming

October 2024

- Implemented minimal x86 bootloader and kernel with custom memory management, process scheduling, and system call interface.
- Built userland shell supporting pipelines, I/O redirection, and background job control; documented build system for reproducible cross-compilation.

Aggie Events | TypeScript, Next.js, React, Tailwind CSS

March 2025 – May 2025

- Built full-stack event discovery platform with responsive Next.js frontend and Node.js API; served campus organizations and students.
- Extended PostgreSQL schema for events, organizations, and user interactions; added composite indexes reducing p95 query latency by 40%.

ApplyEasy Job Automation Engine | n8n, OpenAI API, Google APIs

June 2025

- Architected core automation engine for applyeasy.tech, orchestrating job scraping, LLM-based filtering, LaTeX resume generation, and email outreach.
- Implemented reliable data pipelines processing 100+ job postings daily with structured error handling and retry logic.

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, C/C++, Java, SQL

Frameworks: React, Next.js, FastAPI, Node.js, LangChain

Databases & Tools: PostgreSQL, Docker, Git, GitHub Actions, Linux
