EDUCATION

Texas A&M University

Bachelor of Science in Computer Science; GPA: 3.8/4.0

College Station, TX

May 2026

- Relevant Coursework: Software Engineering, Algorithms, Operating Systems, AI
- Completed writing-intensive coursework including specifications and peer evaluations.

EXPERIENCE

AIPHRODITE

Technical Lead & Full Stack / ML

College Station, TX

Sep. 2024 – Present

- Led a team of 6 engineers to develop a Next.js/React frontend integrated with FastAPI backend for real-time outfit recommendations.
- Built RESTful API endpoints achieving 87% classification accuracy for image tagging; optimized query latency by 40% using PostgreSQL.
- Implemented AI-powered fashion advisor using LangChain and OpenAI, improving click-through rate by 25%.

applyeasy.tech

Founder & Full-Stack Developer

College Station, TX

January 2024 – Present

- Developed an end-to-end job application automation platform using n8n, reducing manual application time by 75%.
- Built React Native mobile app for real-time job status tracking and preference adjustments, enhancing user engagement.
- Integrated Google Workspace APIs for automated document generation and email delivery, hosting on GitHub for reliability.

PROJECTS

carlosOS – Custom Unix Shell | C, Linux, Systems Programming

October 2024

- Implemented a Unix-style shell with process management, pipelines, and I/O redirection using C.
- Developed a custom memory management and system call interface, tested with QEMU.

Aggie Events | TypeScript, Next.js, React, Node.js, PostgreSQL

April 2025

- Built a full-stack event platform with an 8-person team, improving query latency by 40% through optimized PostgreSQL schema.
- Implemented responsive UI components using Next.js and Tailwind CSS for enhanced user experience.

ApplyEasy Job Automation Engine | n8n, OpenAI API, Apify, Google APIs, GitHub, LaTeX

March 2025

- Architected core automation engine for applyeasy.tech, processing over 100 job postings daily with structured error handling.
- Designed LaTeX resume template system with JSON configuration, automating PDF compilation and delivery.

TECHNICAL SKILLS

Languages: TypeScript, Python, JavaScript, C/C++, Java, SQL

Frameworks: React, Next.js, FastAPI, Node.js, LangChain

Databases & Tools: PostgreSQL, Docker, Git, GitHub Actions, Linux
