EDUCATION

Texas A&M University

College Station, TX

Bachelor of Science in Computer Science; GPA: 3.8/4.0

May 2026

- Relevant Coursework: Software Engineering, Algorithms, Operating Systems, AI
- Completed writing-intensive coursework including specifications, user stories, retrospectives, demos, and peer evaluations.

EXPERIENCE

AIPHRODITE

College Station, TX

Technical Lead & Full Stack / ML

Sep. 2024 – Present

- Architected FastAPI backend serving computer vision embeddings and outfit recommendations to 500+ wardrobe items, achieving a 40% reduction in query latency with optimized PostgreSQL schema.
- Developed AI fashion advisor using LangChain and OpenAI embeddings for 500+ wardrobe items, improving click-through rate by 25% through advanced recommendation algorithms.
- Led a team of 6 engineers, implementing Docker-based microservices and configuring CI/CD pipelines with GitHub Actions for streamlined deployment.

applyeasy.tech

College Station, TX

Founder & Full-Stack Developer

January 2024 – Present

- Built end-to-end job application automation pipeline using n8n, processing over 100 jobs per day with OpenAI-powered filtering and LaTeX resume generation.
- Designed an automation platform reducing manual application time by 75% through integrated Google APIs for document generation and email sequences.
- Created a React Native mobile app for real-time job application tracking and feedback integration with a focus on user experience and satisfaction.

PROJECTS

carlosOS – Custom Unix Shell | C, Linux, Systems Programming

October 2024

- Implemented a Unix-style shell supporting process management, I/O redirection, and pipelines, developed in C for educational purposes.
- Designed a basic process model with a round-robin scheduler, enhancing understanding of operating system concepts through hands-on experience.

Aggie Events | TypeScript, Next.js, React, PostgreSQL

August 2023

- Built a full-stack event platform with a responsive UI using Next.js and React, integrating Google OAuth for secure authentication.
- Optimized PostgreSQL database schema to reduce query latency by 40%, improving overall performance for users.

ApplyEasy Job Automation Engine | n8n, OpenAI API, Apify, Google APIs

June 2025

- Architected core automation engine orchestrating job scraping, filtering, and resume generation, processing over 100 job postings daily.
- Implemented robust data pipelines with error handling and batch processing, ensuring high reliability in job automation tasks.

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, C/C++, Java, SQL

Frameworks: React, Next.js, FastAPI, Node.js, LangChain

Databases & Tools: PostgreSQL, Docker, Git, GitHub Actions, Linux
