EDUCATION

Texas A&M University

College Station, TX

Bachelor of Science in Computer Science; GPA: 3.8/4.0

May 2026

- Relevant Coursework: Software Engineering, Algorithms, Operating Systems, AI
- Completed writing-intensive coursework including specifications, user stories, retrospectives, demos, and peer evaluations.

EXPERIENCE

AIPHRODITE

College Station, TX

Technical Lead & Full Stack / ML

Sep. 2024 – Present

- Developed RAG-powered AI fashion advisor using LangChain and OpenAI embeddings over 500+ wardrobe items, improving click-through rate on recommendations by 25%.
- Architected FastAPI backend serving computer vision embeddings and outfit recommendations, reducing query latency by 40% with optimized PostgreSQL schema.
- Led a 6-person team building Next.js/React frontend, integrating real-time outfit recommendations via FastAPI backend.

applyeasy.tech

College Station, TX

Founder & Full-Stack Developer

January 2024 – Present

- Built end-to-end job application automation pipeline using n8n, scrapping over 100 jobs/day and reducing manual application time by 75%.
- Integrated Google Workspace APIs for automated document generation and email sequences, ensuring reliable delivery with GitHub hosting.
- Founded applyeasy.tech, a SaaS platform automating job applications, optimizing prompts and filtering thresholds based on beta user feedback.

PROJECTS

carlosOS – Custom Unix Shell | C, Linux, Systems Programming

October 2024

- Implemented minimal x86 bootloader and kernel with custom memory management, process scheduling, and system call interface.
- Designed basic process model with round-robin scheduler and IPC mechanisms, implementing fork, exec, and signal handling.

Aggie Events | TypeScript, Next.js, React, PostgreSQL

October 2023

- Built full-stack event discovery platform with a responsive Next.js frontend and Node.js API, improving query latency by 40% with optimized PostgreSQL schema.
- Implemented Google OAuth authentication with secure session cookies and environment-based secrets management.

ApplyEasy Job Automation Engine | n8n, OpenAI API, Apify, LaTeX

February 2025

- Architected core automation engine for applyeasy.tech, orchestrating job scraping, LLM-based filtering, and LaTeX resume generation.
- Implemented reliable data pipelines with structured error handling, processing over 100 job postings daily.

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, C/C++, Java, SQL

Frameworks: React, Next.js, FastAPI, Node.js, LangChain

Databases & Tools: PostgreSQL, Docker, Git, GitHub Actions, Linux
