EDUCATION

Texas A&M University

College Station, TX

Bachelor of Science in Computer Science; GPA: 3.8/4.0

May 2026

- Relevant Coursework: Software Engineering, Algorithms, Operating Systems, AI
- Completed writing-intensive coursework including specifications, user stories, retrospectives, demos, and peer evaluations.

EXPERIENCE

AIPHRODITE

College Station, TX

Technical Lead & Full Stack / ML

Sep. 2024 – Present

- Architected FastAPI backend serving computer vision embeddings and outfit recommendations to 500+ wardrobe items; designed PostgreSQL schema with composite indexes reducing query latency by 40%.
- Developed RAG-powered AI fashion advisor using LangChain and OpenAI embeddings, improving recommendation click-through rate by 25%.
- Led 6-person engineering team building Next.js/React frontend integrated with AI-powered styling suggestions, reducing manual data entry time by 80%.

applyeasy.tech

College Station, TX

Founder & Full-Stack Developer

January 2024 – Present

- Built end-to-end job application automation pipeline using n8n, processing 100+ jobs/day and reducing manual application time by 75%.
- Designed fault-tolerant workflow orchestration with conditional branching and logging, reducing silent failures by 90%.
- Founded applyeasy.tech, iterating on product based on beta user feedback to optimize match quality and user satisfaction.

PROJECTS

carlosOS – Custom Unix Shell | C, Linux, Systems Programming

October 2024

- Implementing minimal x86 bootloader and kernel with custom memory management; developing in C/C++ with QEMU for testing.
- Built userland shell supporting pipelines, I/O redirection, and background job control; documented build system for reproducible cross-compilation.

Aggie Events | TypeScript, Next.js, React, Node.js, PostgreSQL

April 2025

- Built full-stack event discovery platform with a responsive Next.js frontend and Node.js API, serving campus organizations and students.
- Extended PostgreSQL schema for events and user interactions, reducing p95 query latency by 40%.

ApplyEasy Job Automation Engine | n8n, OpenAI API, Apify, LaTeX

2025

- Architected core automation engine orchestrating job scraping, LLM-based filtering, and LaTeX resume generation using n8n workflow primitives.
- Implemented data pipelines processing 100+ job postings daily with structured error handling and reliable delivery.

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, C/C++, Java, SQL

Frameworks: React, Next.js, FastAPI, Node.js, LangChain

Databases & Tools: PostgreSQL, Docker, Git, GitHub Actions, Linux
