EDUCATION

Texas A&M University

College Station, TX

Bachelor of Science in Computer Science; GPA: 3.8/4.0

May 2026

- Relevant Coursework: Software Engineering, Algorithms, Operating Systems, AI
- Completed writing-intensive coursework including specifications and user stories

EXPERIENCE

AIPHRODITE

College Station, TX

Technical Lead & Full Stack / ML

Sep. 2024 – Present

- Developed AI-powered fashion advisor using LangChain and OpenAI for 500+ wardrobe items, enhancing user engagement with personalized recommendations.
- Architected FastAPI backend serving image classification APIs with 87% accuracy; improved database query latency by 40% through optimized indexing.
- Led a 6-person team to integrate real-time recommendations via React.js frontend, reducing manual data entry time by 80%.

applyeasy.tech

College Station, TX

Founder & Full-Stack Developer

January 2024 – Present

- Built end-to-end job application automation tool using n8n, reducing application time by 75% through AI-powered role filtering and resume generation.
- Designed and implemented a React Native companion app for real-time job tracking and application management, enhancing user experience.
- Orchestrated automated workflows with Google APIs for document generation and personalized outreach, improving process reliability by 90%.

PROJECTS

carlosOS – Custom Unix Shell | C, Linux, Systems Programming

October 2024

- Implemented Unix-style shell with process scheduling, and system calls; developed in C using QEMU for testing.
- Built a userland shell supporting pipelines and I/O redirection, applying concepts from systems programming coursework.

Aggie Events | TypeScript, Next.js, React, Node.js, PostgreSQL

2023

- Built full-stack event platform with Next.js frontend and Node.js backend, improving query latency by 40% through optimized PostgreSQL indexing.
- Implemented secure Google OAuth authentication and environment-based secrets management for enhanced user security.

ApplyEasy Job Automation Engine | n8n, OpenAI API, Apify, Google APIs

2025

- Architected automation engine for job applications using n8n, processing over 100 job postings daily with AI-driven filtering.
- Designed LaTeX resume template system with automated PDF generation and GitHub hosting for seamless resume delivery.

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, C/C++, Java, SQL

Frameworks: React.js, Next.js, FastAPI, Node.js, LangChain

Databases & Tools: PostgreSQL, Docker, Git, GitHub Actions, Linux
