EDUCATION

Texas A&M University

College Station, TX

Bachelor of Science in Computer Science; GPA: 3.8/4.0

May 2026

- Relevant Coursework: Software Engineering, Algorithms, Operating Systems, AI
- Completed writing-intensive coursework including specifications, user stories, and peer evaluations.

EXPERIENCE

AIPHRODITE

College Station, TX

Technical Lead & Full Stack / ML

Sep. 2024 – Present

- Architected FastAPI backend serving computer vision embeddings and outfit recommendations for over 500 wardrobe items, optimizing PostgreSQL query latency by 40%.
- Built RESTful API endpoints for image tagging with 87% classification accuracy and implemented efficient database queries using Prisma ORM.
- Containerized microservices with Docker and configured CI/CD pipelines using GitHub Actions for automated testing and deployment.

applyeasy.tech

College Station, TX

Founder & Full-Stack Developer

January 2024 – Present

- Developed an end-to-end job application automation pipeline using n8n, processing over 100 jobs daily with OpenAI-powered filtering and LaTeX resume generation.
- Designed fault-tolerant orchestration workflows, reducing silent failures by 90% through structured logging and retry logic.
- Integrated Google Workspace APIs to automate document generation and email sequencing, reducing manual application time by 75%.

PROJECTS

carlosOS – Custom Unix Shell | C, Linux, Systems Programming

October 2024

- Implemented a minimal x86 bootloader and kernel with custom memory management, process scheduling, and system call interface in C/C++.
- Developed a Unix-style shell supporting process management, pipelines, and I/O redirection, applying core concepts from systems coursework.

Aggie Events | TypeScript, Next.js, React, Node.js

June 2025

- Built a full-stack event discovery platform with a responsive Next.js frontend and a Node.js API, serving campus organizations and students.
- Implemented Google OAuth authentication, optimizing session management and security with CORS and environment-based secrets.

ApplyEasy Job Automation Engine | n8n, OpenAI API, Apify, Google APIs

April 2025

- Architected core automation engine for job scraping, AI-based filtering, and LaTeX resume generation, processing over 100 job postings daily.
- Implemented structured error handling and data pipelines, ensuring reliable and efficient job processing and document generation.

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, C/C++, Java, SQL

Frameworks: React, Next.js, FastAPI, Node.js, LangChain

Databases & Tools: PostgreSQL, Docker, Git, GitHub Actions, Linux
