

Carlos Luna-Peña

Computer Science @ Texas A&M

carlunpen@gmail.com | GitHub | LinkedIn | applyeasy.tech | College Station, TX

EDUCATION

Texas A&M University

College Station, TX

Bachelor of Science in Computer Science; Major GPA: 3.62/4.00

Aug. 2023 – Present

- Relevant Coursework: Software Engineering, Algorithms, Operating Systems, Artificial Intelligence, Computer Security, Computer Systems, Data Structures.
- Completed writing-intensive coursework including specifications, user stories, retrospectives, demos, and peer evaluations.

EXPERIENCE

AIPHRODITE

College Station, TX

Technical Lead & Full Stack / ML

Sep. 2024 – Present

- Architected FastAPI backend serving computer vision embeddings and outfit recommendations to 500+ wardrobe items; designed PostgreSQL schema with composite indexes reducing query latency by 40%.
- Led 6-person engineering team building Next.js/React frontend with Tailwind CSS; integrated real-time outfit recommendations via FastAPI backend and PostgreSQL.
- Containerized microservices with Docker and configured GitHub Actions CI/CD pipeline for automated testing and deployment.

applyeasy.tech

Remote

Founder & Full-Stack / Automation Engineer

2025

- Built end-to-end job application automation pipeline using n8n: scrapes 100+ jobs/day via Apify, filters with OpenAI, generates tailored LaTeX resumes, and sends personalized outreach emails.
- Founded applyeasy.tech, a SaaS platform automating job applications: role discovery, AI-powered filtering, resume generation, and outreach sequencing—reducing manual application time by 75%.
- Integrated Google Workspace APIs (Slides, Sheets, Gmail) for automated document generation and email sequences.

PROJECTS

carlosOS (Educational Operating System)

C, C++, x86 Assembly, QEMU, Make, GDB

- Building educational operating system from scratch in C/C++: bootloader, kernel, process scheduler, and system calls; testing with QEMU and GDB.
- Implemented Unix-style shell with process management (fork/exec), pipelines (pipe/dup2), and I/O redirection; applied concepts from computer systems coursework.

Aggie EventsTypeScript, Next.js, React, Tailwind CSS, Node.js, PostgreSQL, Docker, Google OAuth, GitHub Actions

- Built full-stack event discovery platform with 8-person team: responsive Next.js frontend, Node.js API, and PostgreSQL database serving campus organizations and students.
- Extended PostgreSQL schema for events, organizations, and user interactions; added composite indexes reducing p95 query latency by 40%.

LaTeX Resume Builder & CLI/Action

TypeScript, Node.js, LaTeX, GitHub Actions

- Developed JSON-to-LaTeX resume generator with TypeScript CLI; compiles structured resume data into ATS-optimized single-page PDFs.
- Published reusable GitHub Action that automatically builds resume PDFs on push and uploads artifacts; documented integration for developer workflows.

TECHNICAL SKILLS

Languages: TypeScript, Python, JavaScript, C, C++, SQL

Frameworks/Libraries: React.js, Next.js, Node.js, Tailwind CSS, FastAPI

Databases: PostgreSQL, SQLite, Prisma ORM

Tools/Platforms: Docker, GitHub, GitHub Actions, n8n, OpenAI API, Google APIs
