EDUCATION

Texas A&M University

College Station, TX

Bachelor of Science in Computer Science; GPA: 3.8/4.0

May 2026

- Relevant Coursework: Software Engineering, Algorithms, Operating Systems, AI
- Completed writing-intensive coursework including specifications and user stories.

EXPERIENCE

AIPHRODITE

College Station, TX

Technical Lead & Full Stack / ML

Sep. 2024 – Present

- Architected FastAPI backend serving computer vision embeddings and outfit recommendations for 500+ wardrobe items; optimized PostgreSQL schema reducing query latency by 40%.
- Developed AI fashion advisor using LangChain and OpenAI embeddings; improved click-through rate on outfit recommendations by 25%.
- Led 6-person engineering team building Next.js/React frontend; reduced PR rework rate by 35% through effective sprint planning and backlog grooming.

applyeasy.tech

College Station, TX

Founder & Full-Stack Developer

January 2024 – Present

- Founded applyeasy.tech, automating job applications with a 75% reduction in manual application time; integrated n8n, OpenAI, and LaTeX for seamless workflow.
- Built React Native mobile app for real-time role review and application tracking; iterated on product improvements based on early user feedback.
- Implemented GPT-powered job relevance scoring using OpenAI API; designed prompts for accurate role filtering aligned with user preferences.

PROJECTS

carlosOS – Custom Unix Shell | C, Linux, Systems Programming

October 2024

- Implemented educational operating system from scratch, including bootloader, kernel, and process scheduler; developed in C/C++ with QEMU for testing.
- Built Unix-style shell with process management, I/O redirection, and pipelines; applied concepts from operating systems coursework.

Aggie Events | TypeScript, Next.js, React, PostgreSQL

March 2025

- Developed full-stack event discovery platform with responsive Next.js frontend and Node.js API; optimized PostgreSQL queries reducing p95 latency by 40%.
- Implemented Google OAuth authentication and secure session management; handled user interactions with comprehensive schema design.

ApplyEasy Job Automation Engine | n8n, OpenAI API, LaTeX

December 2024

- Architected automation engine for applyeasy.tech orchestrating job scraping, filtering, and resume generation using n8n workflow primitives.
- Designed LaTeX resume template system with JSON configuration; automated PDF generation and GitHub hosting for seamless delivery.

TECHNICAL SKILLS

Languages: TypeScript, Python, JavaScript, C/C++, Java, SQL

Frameworks: React, Next.js, FastAPI, Node.js, LangChain

Databases & Tools: PostgreSQL, Docker, Git, GitHub Actions, Linux
