EDUCATION

Texas A&M University

College Station, TX

Bachelor of Science in Computer Science; GPA: 3.8/4.0

May 2026

- Relevant Coursework: Software Engineering, Algorithms, Operating Systems, AI
- Completed writing-intensive coursework including specifications and user stories

EXPERIENCE

AIPHRODITE

College Station, TX

Technical Lead & Full Stack / ML

Sep. 2024 – Present

- Architected FastAPI backend serving computer vision embeddings and outfit recommendations to 500+ wardrobe items, reducing query latency by 40%.
- Developed RAG-powered AI fashion advisor using LangChain and OpenAI embeddings, improving click-through rate on recommendations by 25%.
- Led 6-person engineering team with sprint planning and daily standups, reducing PR rework rate by 35%.

applyeasy.tech

College Station, TX

Founder & Full-Stack Developer

January 2024 – Present

- Built end-to-end job application automation pipeline using n8n, processing over 100 jobs/day and reducing manual application time by 75%.
- Founded applyeasy.tech, a SaaS platform automating job applications with AI-powered filtering and personalized outreach.
- Implemented GPT-powered job relevance scoring and intelligent resume tailoring system using OpenAI API, optimizing for ATS parsing.

PROJECTS

carlosOS – Custom Unix Shell | C, Linux, Systems Programming

October 2024

- Implemented minimal x86 bootloader and kernel with custom memory management and process scheduling in C/C++.
- Built userland shell supporting pipelines, I/O redirection, and background job control, applying Unix semantics.

Aggie Events | TypeScript, Next.js, React, Tailwind CSS

February 2025

- Built full-stack event discovery platform with responsive Next.js frontend and optimized PostgreSQL schema, reducing query latency by 40%.
- Implemented Google OAuth authentication and secure session management with environment-based secrets.

ApplyEasy Job Automation Engine | n8n, OpenAI API, Apify, Google APIs

March 2025

- Architected core automation engine orchestrating job scraping, LLM-based filtering, and LaTeX resume generation using n8n.
- Implemented reliable data pipelines with structured error handling, processing over 100 job postings daily.

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, C/C++, Java, SQL

Frameworks: React, Next.js, FastAPI, Node.js, LangChain

Databases & Tools: PostgreSQL, Docker, Git, GitHub Actions, Linux
