PROFESSIONAL SUMMARY

CS student @ Texas A&M specializing in backend and systems engineering. Experienced in building production-ready web and AI solutions. Proficient in Docker, CI/CD pipelines, TypeScript/Node.js, Python, SQL. Led Agile teams with effective sprints and reviews.

EDUCATION

Texas A&M University

College Station, TX

B.S. in Computer Science

Aug. 2023 – Present

- Selected Coursework: CSCE 331 (Software Engineering Foundations), CSCE 411 (Algorithms), CSCE 410 (Operating Systems), CSCE 420 (Artificial Intelligence), CSCE 465 (Security).
- Notable Projects include aspects of writing-intensive coursework with demos and retrospectives.

EXPERIENCE

AIPHRODITE (Aggies Create)

College Station, TX

Team Lead & ML Engineer

Sep. 2025 – Present

- Developed computer vision tagging for apparel products with PyTorch; deployed scalable API with FastAPI and PostgreSQL.
- Improved engagement by designing a recommendation system incorporating weather, color harmony, and novelty metrics.
- Led Agile ceremonies including sprints, PR reviews, and onboarding; achieved demo-ready stability and optimized cycle time.

HECM Hackathon

Participant

Feb. 2024

- Created gesture and facial recognition demo with a Raspberry Pi and 6-axis robotic arm; demonstrated effective integration of control loops.
- Contributed to the team by ensuring reproducible setup and bill of materials, showcasing among numerous teams.

PROJECTS

Aggie Events | TypeScript, Next.js, React, Tailwind, Node.js, PostgreSQL, Docker, Google OAuth Aug. 2024 – Present

- Developed responsive and accessible front-end pages and components improving user interaction and event visibility.
- Integrated Google OAuth with secure cookies and CORS; enhanced database schema for performance and scalability.
- Established CI processes ensuring reliable deployment with linting, type-checking, and comprehensive tests.

Panda Express POS (CSCE 331 Team Project 2) | API, Database, Agile/Scrum

Fall 2025

- Built robust endpoints handling inventory and orders; implemented role-based access control ensuring secure data operations.
- Enforced high test coverage and containerized deployments for stable CI integrations and seamless API delivery.

Aggie Shell | C/C++, Linux, OS/IPC

PA 2

- Developed Unix-like shell supporting pipeline processing, I/O redirection, and background jobs without fd leaks.
- Handled multi-stage pipelines and sophisticated command execution scenarios with robust user prompt features.

TECHNICAL SKILLS

Languages: TypeScript, Java, Python, C/C++, SQL

Frameworks & Libraries: React, Next.js, Tailwind, Electron, Node.js, PyTorch, FastAPI

Databases: PostgreSQL, SQLite

Tools & DevOps: Docker, Git/GitHub, GitHub Actions, Linux, OAuth, CORS, n8n, Apify

Concepts: REST API, microservices, OAuth, schema design, indexing, query optimization, CI/CD, Agile/Scrum
