PROFESSIONAL SUMMARY

CS student at Texas A&M University with experience in building robust web and AI systems. Led Agile teams through sprints and PR reviews, focusing on backend development and AI pipelines. Proficient in TypeScript, React, Node.js, Python, and SQL.

EDUCATION

Texas A&M University

Bachelor of Science in Computer Science

College Station, TX

Aug. 2023 – Present

- Relevant Coursework: Software Engineering, Algorithms, Operating Systems, Artificial Intelligence, Security, Computer Systems.
- Writing-intensive courses with user stories, retrospectives, and demos.

EXPERIENCE

AIPHRODITE (Aggies Create)

Team Lead & ML Engineer

College Station, TX

Sep. 2025 – Present

- Implemented computer vision tagging and embeddings with FastAPI and PyTorch; maintained high accuracy across various items.
- Crafted an outfit recommender system improving user engagement; boosted CTR through iterative user feedback loops.
- Led Agile sprints from standups to retrospectives; ensured demo-ready stability with reduced PR rework.
- Developed ETL processes and dockerized services for consistent demo delivery.

HECM Hackathon

Participant

College Station, TX

Feb. 2024

- Designed a gesture and color-tracking system with a Raspberry Pi and robotic arm, showcased among numerous innovative projects.

PROJECTS

Aggie Events

Aug. 2024 – Present

- Constructed responsive interfaces using Next.js and React; incorporated Google OAuth for secure authentication.
- Enhanced PostgreSQL setups for reduced latency, achieving notable performance improvements.
- Managed CI pipelines to enforce code quality and stability.

Panda Express POS

Fall 2025

- Built APIs for handling inventory and order processing with high test coverage within an Agile framework.
- Utilized containerized environments to ensure stable and consistent release iterations.

Studytick (Desktop)

Ongoing

- Developed a productivity application using Electron and React, featuring a Pomodoro timer with persistent session storage.

TECHNICAL SKILLS

Languages: TypeScript, Java, Python, C/C++, SQL

Frameworks: React, Next.js, Node.js, Tailwind, FastAPI

DevOps: Docker, Git/GitHub, GitHub Actions

Concepts: RESTful API Design, Agile/Scrum, Automated Testing, OAuth 2.0
