SUMMARY

CS student at Texas A&M building production web/AI systems; led Agile teams (standups, PR reviews, retrospectives) and shipped backend + data workflows. Fluent in TypeScript/React/Node.js, Python, SQL, Linux; delivered IPC/process work in a Unix shell from scratch.

EDUCATION

Texas A&M University

B.S. in Computer Science

College Station, TX

Aug. 2023 – Present

- Relevant Coursework: CSCE 331 (Software Engineering), CSCE 411 (Algorithms), CSCE 410 (Operating Systems), CSCE 420 (Artificial Intelligence), CSCE 465 (Security)
- Writing-intensive (W) with specifications, user stories, retrospectives, and demos

EXPERIENCE

AIPHRODITE (Aggies Create)

Team Lead & ML Engineer

College Station, TX

Sep. 2025 – Present

- Implemented computer vision tagging and embeddings served via FastAPI; Postgres schema designed for retrieval; achieved tagging accuracy on a large dataset.
- Developed outfit recommender system optimizing for weather and color harmony, improving CTR by iterating on user feedback.
- Led sprints, PR reviews, and onboarding; maintained PR rework under control; ensured demo-ready stability.
- Built ingestion pipelines and health checks; containerized services for consistent demos.

Aggie Events

Full-Stack Developer

College Station, TX

Aug. 2024 – Present

- Designed and built responsive web components; incorporated Google OAuth with secure cookies and environmental secrets for authentication.
- Extended PostgreSQL schema and improved query performance, reducing p95 latency.
- Maintained CI on monorepo ensuring lint, type-check, and test stability.

PROJECTS

Panda Express POS

Fall 2025

- Implemented backend services for inventory and orders management; ensured high test coverage and deployment stability with CI pipelines.
- Conducted retrospectives and status updates for Agile methodologies.

Monee - TAMUhack 2025

- Developed a gamified financial literacy application using Next.js; used CSV parsing for transaction data and provided chatbot-based financial advice.

HECM Hackathon

Feb. 2024

- Created a gesture and face tracking prototype with control loops using a Raspberry Pi and a robotic arm; set up reproducible environments among competing teams.

TECHNICAL SKILLS

Programming Languages: TypeScript, Python, Java, C/C++, SQL

Frameworks/Libraries: React, Next.js, Node.js, FastAPI, PyTorch, Tailwind CSS

Databases: PostgreSQL, SQLite

Tools: Docker, Git, GitHub Actions, Linux, Bash, n8n, Apify

Concepts: RESTful APIs, OAuth 2.0, CORS, Unit Testing, CI/CD, Agile/Scrum
