EDUCATION

Texas A&M University

College Station, TX

Bachelor of Science in Computer Science; GPA: 3.8/4.0

May 2026

- Relevant Coursework: Software Engineering, Algorithms, Operating Systems, AI
- Completed writing-intensive coursework including specifications, user stories, retrospectives, demos, and peer evaluations.

EXPERIENCE

AIPHRODITE

College Station, TX

Technical Lead & Full Stack / ML

Sep. 2024 – Present

- Architected FastAPI backend serving computer vision embeddings and outfit recommendations to 500+ wardrobe items, reducing query latency by 40%.
- Built RESTful API endpoints for image tagging achieving 87% classification accuracy; implemented Prisma ORM for efficient database queries.
- Containerized microservices with Docker and configured GitHub Actions CI/CD pipeline for automated testing and deployment.

applyeasy.tech

College Station, TX

Founder & Full-Stack Developer

January 2024 – Present

- Built end-to-end job application automation pipeline using n8n, scrapes 100+ jobs/day via Apify, filters with OpenAI, generates tailored LaTeX resumes, and sends personalized emails.
- Founded applyeasy.tech, a SaaS platform automating job applications, reducing manual application time by 75%.
- Integrated Google Workspace APIs for automated document generation and email sequences; hosted compiled PDFs on GitHub for reliable delivery.

PROJECTS

carlosOS – Custom Unix Shell | C, Linux, Systems Programming

October 2024

- Implemented minimal x86 bootloader and kernel with custom memory management, process scheduling, and system call interface.
- Built userland shell supporting pipelines, I/O redirection, and background job control; documented build system for reproducible cross-compilation.

Aggie Events | TypeScript, Next.js, React, PostgreSQL

March 2024

- Built full-stack event discovery platform with responsive Next.js frontend and PostgreSQL database, reducing p95 query latency by 40%.
- Implemented Google OAuth authentication with secure session cookies and CORS configuration.

ApplyEasy Job Automation Engine | n8n, OpenAI API, Apify, GitHub

August 2024

- Architected core automation engine for applyeasy.tech orchestrating job scraping, LLM-based filtering, and LaTeX resume generation.
- Designed reliable data pipelines with structured error handling; processes 100+ job postings daily.

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, C/C++, Java, SQL

Frameworks: React, Next.js, FastAPI, Node.js, LangChain

Databases & Tools: PostgreSQL, Docker, Git, GitHub Actions, Linux
