EDUCATION

Texas A&M University

College Station, TX

Bachelor of Science in Computer Science; GPA: 3.8/4.0

May 2026

- Relevant Coursework: Software Engineering, Algorithms, Operating Systems, AI
- Completed writing-intensive coursework including specifications and peer evaluations

EXPERIENCE

AIPHRODITE

College Station, TX

Technical Lead & Full Stack / ML

Sep. 2024 – Present

- Led a 6-person engineering team in building a Next.js/React frontend integrated with a FastAPI backend, improving real-time outfit recommendations for users.
- Architected a FastAPI backend serving computer vision embeddings and outfit recommendations, achieving a 40% reduction in query latency.
- Developed an AI fashion advisor using LangChain and OpenAI embeddings, enhancing user engagement with a 25% improvement in click-through rates.

applyeasy.tech

College Station, TX

Founder & Full-Stack Developer

January 2024 – Present

- Founded a SaaS platform automating job applications with n8n, OpenAI, and LaTeX, reducing manual application time by 75%.
- Implemented a job application automation pipeline processing over 100 jobs per day, integrating Google Workspace APIs for seamless document and email management.
- Built a React Native mobile app for real-time role discovery and application status monitoring, enhancing user interaction and satisfaction.

PROJECTS

carlosOS – Custom Unix Shell | C, Linux, Systems Programming

October 2024

- Developed a Unix-style shell with process management, pipelines, and I/O redirection, applying concepts from advanced computer systems coursework.
- Implemented a minimal x86 bootloader and kernel with custom memory management, using QEMU for testing and debugging.

Aggie Events | TypeScript, Next.js, React, PostgreSQL

March 2024

- Built a full-stack event discovery platform with a responsive Next.js frontend and a PostgreSQL database, reducing query latency by 40%.
- Configured Google OAuth authentication and enhanced security with secure session management and environment-based secrets.

ApplyEasy Job Automation Engine | n8n, OpenAI API, Apify, Google APIs

November 2024

- Architected a core automation engine for job scraping, LLM-based filtering, and email outreach using n8n workflow primitives.
- Designed a LaTeX resume template system with automated PDF compilation and GitHub hosting, ensuring seamless delivery.

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, C/C++, Java, SQL

Frameworks: React, Next.js, FastAPI, Node.js, LangChain

Databases & Tools: PostgreSQL, Docker, Git, GitHub Actions, Linux
