EDUCATION

Texas A&M University <i>Bachelor of Science in Computer Science; GPA: 3.8/4.0</i> - Relevant Coursework: Software Engineering, Algorithms, Operating Systems, AI - Completed writing-intensive coursework including specifications, user stories, and retrospectives.	College Station, TX <i>May 2026</i>
---	--

EXPERIENCE

AIPHRODITE <i>Technical Lead & Full Stack / ML</i> - Architected FastAPI backend serving computer vision embeddings and outfit recommendations to 500+ wardrobe items, reducing query latency by 40%. - Developed RAG-powered AI fashion advisor using LangChain and OpenAI embeddings for natural language queries on fit and styling. - Directed 6-person cross-functional team with agile methodologies, maintaining demo-ready builds and reducing PR rework by 35%.	College Station, TX <i>Sep. 2024 – Present</i>
applyeasy.tech <i>Founder & Full-Stack Developer</i> - Built end-to-end job application automation pipeline using n8n, processing 100+ jobs/day and reducing manual application time by 75%. - Founded applyeasy.tech, a SaaS platform automating job applications with AI-powered filtering and resume generation. - Integrated Google Workspace APIs for automated document generation and email sequences, ensuring seamless delivery.	College Station, TX <i>January 2024 – Present</i>

PROJECTS

carlosOS – Custom Unix Shell <i>C, Linux, Systems Programming</i> - Implemented minimal x86 bootloader and kernel with custom memory management and process scheduling. - Built userland shell supporting pipelines, I/O redirection, and background job control.	October 2024
Aggie Events <i>TypeScript, Next.js, React, Node.js</i> - Built full-stack event discovery platform with responsive Next.js frontend and PostgreSQL database. - Extended PostgreSQL schema and added composite indexes reducing p95 query latency by 40%.	Date
ApplyEasy Job Automation Engine <i>n8n, OpenAI API, Apify, Google APIs</i> - Architected core automation engine for applyeasy.tech, orchestrating job scraping and AI-based filtering. - Implemented reliable data pipelines processing 100+ job postings daily with structured error handling.	Date

TECHNICAL SKILLS

Languages: TypeScript, Python, JavaScript, C/C++, Java, SQL
Frameworks: React, Next.js, FastAPI, Node.js, LangChain
Databases & Tools: PostgreSQL, Docker, Git, GitHub Actions, Linux
