

# Carlos Luna-Peña

Computer Science @ Texas A&M University  
carlunpen@tamu.edu | github.com/clmoon2 | linkedin.com/in/carlunpen

## EDUCATION

### Texas A&M University

College Station, TX

*Bachelor of Science in Computer Science; GPA: 3.8/4.0*

*May 2026*

- Relevant Coursework: Software Engineering, Algorithms, Operating Systems, AI
- Completed writing-intensive coursework including specifications, user stories, retrospectives, demos, and peer evaluations.

## EXPERIENCE

### AIPHRODITE

College Station, TX

*Technical Lead & Full Stack / ML*

*Sep. 2024 – Present*

- Architected FastAPI backend serving computer vision embeddings and outfit recommendations to 500+ wardrobe items; designed PostgreSQL schema reducing query latency by 40%.
- Built RESTful API endpoints for image tagging achieving 87% classification accuracy; implemented efficient database queries with Prisma ORM.
- Containerized microservices with Docker and configured GitHub Actions CI/CD pipeline for automated testing and deployment.

### applyeasy.tech

College Station, TX

*Founder & Full-Stack Developer*

*January 2024 – Present*

- Built end-to-end job application automation pipeline using n8n: scrapes 100+ jobs/day via Apify, filters with OpenAI, and sends personalized outreach emails.
- Designed fault-tolerant workflow orchestration with structured logging and retry logic; reduced silent failures by 90%.
- Integrated Google Workspace APIs for automated document generation and email sequences; hosted compiled PDFs on GitHub for reliable delivery.

## PROJECTS

### carlosOS – Custom Unix Shell | C, Linux, Systems Programming

October 2024

- Implemented minimal x86 bootloader and kernel with custom memory management and system call interface; developed in C/C++ with QEMU for testing.
- Designed basic process model with round-robin scheduler and IPC mechanisms; implemented fork, exec, pipe, and signal handling based on Unix semantics.

### Aggie Events | TypeScript, Next.js, React, PostgreSQL

2024

- Built full-stack event discovery platform with 8-person team: responsive Next.js frontend, Node.js API, and PostgreSQL database.
- Extended PostgreSQL schema for events and user interactions; added composite indexes reducing p95 query latency by 40%.

### ApplyEasy Job Automation Engine | n8n, OpenAI API, Apify, Google APIs

2025

- Architected core automation engine for applyeasy.tech: orchestrated job scraping, LLM-based filtering, and email outreach using n8n.
- Implemented reliable data pipelines with structured error handling; processes 100+ job postings daily.

## TECHNICAL SKILLS

**Languages:** Python, TypeScript, JavaScript, C/C++, Java, SQL

**Frameworks:** React, Next.js, FastAPI, Node.js, LangChain

**Databases & Tools:** PostgreSQL, Docker, Git, GitHub Actions, Linux
