EDUCATION

Texas A&M University

College Station, TX

Bachelor of Science in Computer Science; GPA: 3.8/4.0

May 2026

- Relevant Coursework: Software Engineering, Algorithms, Operating Systems, AI
- Completed writing-intensive coursework including specifications and demos.

EXPERIENCE

AIPHRODITE

College Station, TX

Technical Lead & Full Stack / ML

Sep. 2024 – Present

- Led 6-person engineering team developing high-performance user interfaces using React.js and Tailwind CSS, integrating real-time fashion recommendations via FastAPI backend and PostgreSQL.
- Architected RESTful API endpoints for image tagging and outfit recommendations, achieving 87% classification accuracy and improving query latency by 40%.
- Implemented AI-powered fashion advisor using LangChain and OpenAI API, improving click-through rate on recommendations by 25%.

applyeasy.tech

College Station, TX

Founder & Full-Stack Developer

January 2024 – Present

- Built a job application automation platform using n8n, reducing manual application time by 75% and processing over 100 jobs daily.
- Developed a React Native mobile app for real-time job tracking and personalization, enhancing user engagement and satisfaction.
- Implemented GPT-powered job relevance scoring with OpenAI API, optimizing resume generation for ATS parsing.

PROJECTS

carlosOS – Custom Unix Shell | C, Linux, Systems Programming

October 2024

- Implemented a Unix-style shell with process management, pipelines, and I/O redirection, applying concepts from computer systems coursework.
- Developed a minimal x86 bootloader and kernel with custom memory management and process scheduling, tested using QEMU.

Aggie Events | TypeScript, Next.js, React, Tailwind CSS, Node.js, PostgreSQL

2025

- Built a full-stack event discovery platform with responsive Next.js frontend and Node.js API, reducing query latency by 40%.
- Implemented Google OAuth authentication and secure session management, enhancing user experience and security.

ApplyEasy Job Automation Engine | n8n, OpenAI API, Apify, Google APIs

2025

- Architected core automation engine for applyeasy.tech, orchestrating job scraping and LLM-based filtering with n8n.
- Implemented LaTeX resume generation and email outreach automation, processing over 100 job postings daily.

TECHNICAL SKILLS

Languages: TypeScript, Python, JavaScript, C/C++, Java, SQL

Frameworks: React.js, Next.js, FastAPI, Node.js, LangChain

Databases & Tools: PostgreSQL, Docker, Git, GitHub Actions, Linux
