EDUCATION

Texas A&M University

College Station, TX

Bachelor of Science in Computer Science; GPA: 3.8/4.0

May 2026

- Relevant Coursework: Software Engineering, Algorithms, Operating Systems, AI
- Completed writing-intensive coursework including specifications, user stories, retrospectives, demos, and peer evaluations.

EXPERIENCE

AIPHRODITE

College Station, TX

Technical Lead & Full Stack / ML

Sep. 2024 – Present

- Led a 6-person team to build a Next.js/React frontend with AI-powered styling features, integrating FastAPI backend and PostgreSQL to enhance real-time outfit recommendations.
- Architected FastAPI backend serving computer vision embeddings; designed PostgreSQL schema with composite indexes, reducing query latency by 40%.
- Implemented AI-driven outfit recommendations using LangChain and OpenAI embeddings, improving click-through rates by 25%.

applyeasy.tech

Remote

Founder & Full-Stack Developer

January 2024 – Present

- Founded applyeasy.tech, automating job applications, reducing manual application time by 75% through AI-powered filtering and resume generation.
- Developed end-to-end job application pipeline using n8n, processing over 100+ job postings daily with structured logging and retry logic.
- Integrated Google Workspace APIs for automated document management, ensuring reliable delivery of compiled resumes.

PROJECTS

carlosOS – Custom Unix Shell | C, Linux, Systems Programming

October 2024

- Built educational operating system from scratch, developing a Unix-style shell with process management and I/O redirection.
- Implemented memory management and process scheduling using C/C++ and x86 Assembly, tested with QEMU.

Aggie Events | TypeScript, Next.js, React, Node.js, PostgreSQL

March 2025

- Developed full-stack event discovery platform, improving query latency by 40% through optimized PostgreSQL schema and indexing.
- Implemented Google OAuth for secure authentication, managing user sessions with environment-based secrets.

ApplyEasy Job Automation Engine | n8n, OpenAI API, Apify, Google APIs

February 2025

- Architected core automation engine for applyeasy.tech, orchestrating job scraping, AI-based filtering, and LaTeX resume generation.
- Designed LaTeX resume system with JSON configuration, ensuring seamless PDF compilation and GitHub hosting.

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, C/C++, Java, SQL

Frameworks: React, Next.js, FastAPI, Node.js, LangChain

Databases & Tools: PostgreSQL, Docker, Git, GitHub Actions, Linux
