EDUCATION

Texas A&M University

College Station, TX

Bachelor of Science in Computer Science; GPA: 3.8/4.0

May 2026

- Relevant Coursework: Software Engineering, Algorithms, Operating Systems, AI
- Completed writing-intensive coursework including specifications, user stories, and retrospectives.

EXPERIENCE

AIPHRODITE

College Station, TX

Technical Lead & Full Stack / ML

Sep. 2024 – Present

- Led a 6-person team to build a Next.js/React frontend and FastAPI backend, integrating real-time outfit recommendations and AI-powered styling suggestions.
- Developed RESTful API endpoints for image tagging with 87% classification accuracy, improving user engagement with a 25% increase in click-through rates.
- Architected FastAPI backend with PostgreSQL schema optimization, reducing query latency by 40% and streamlining outfit recommendation processes.

applyeasy.tech

Remote

Founder & Full-Stack Developer

January 2024 – Present

- Founded a SaaS platform automating job applications, reducing manual application time by 75% through end-to-end automation using n8n and OpenAI.
- Built a React Native mobile app for real-time job application tracking, enhancing user interaction and satisfaction.
- Designed an automation pipeline processing 100+ jobs/day, integrating Google APIs for seamless document generation and email outreach.

PROJECTS

carlosOS – Custom Unix Shell | C, Linux, Systems Programming

October 2024

- Implemented a Unix-style shell with features like process management, pipelines, and I/O redirection, applying concepts from computer systems coursework.
- Developed minimal x86 bootloader and kernel with custom memory management and process scheduling, testing with QEMU and GDB.

Aggie Events | TypeScript, Next.js, React, Node.js, PostgreSQL

March 2025

- Built a full-stack event discovery platform with a responsive Next.js frontend and Node.js API, serving campus organizations and students.
- Optimized PostgreSQL schema and added composite indexes, reducing query latency by 40% and improving data retrieval efficiency.

ApplyEasy Job Automation Engine | n8n, OpenAI API, Apify, Google APIs, GitHub, LaTeX

July 2025

- Architected core automation engine for job scraping, LLM-based filtering, and resume generation using n8n workflow primitives.
- Implemented reliable data pipelines processing 100+ job postings daily, enhancing job application efficiency and accuracy.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, C/C++, Java, SQL

Frameworks: React.js, Next.js, FastAPI, Node.js, LangChain

Databases & Tools: PostgreSQL, Docker, Git, GitHub Actions, Linux
