EDUCATION

Texas A&M University

College Station, TX

Bachelor of Science in Computer Science; GPA: 3.8/4.0

May 2026

- Relevant Coursework: Software Engineering, Algorithms, Operating Systems, AI
- Completed writing-intensive coursework including specifications and retrospectives

EXPERIENCE

AIPHRODITE

College Station, TX

Technical Lead & Full Stack / ML

Sep. 2024 – Present

- Architected FastAPI backend serving computer vision embeddings and outfit recommendations for over 500 wardrobe items, reducing query latency by 40%.
- Developed AI fashion advisor using LangChain and OpenAI embeddings, improving click-through rates by 25% in prototype testing.
- Led a team of 6 engineers through Agile sprints, achieving a 35% reduction in rework by implementing code standards and mentoring new members.

applyeasy.tech

College Station, TX

Founder & Full-Stack Developer

January 2024 – Present

- Built an end-to-end job application automation pipeline using n8n, processing over 100 jobs daily and reducing manual application time by 75%.
- Founded applyeasy.tech, a SaaS platform that automates job applications with AI-powered filtering and personalized LaTeX resume generation.
- Integrated Google Workspace APIs to automate document generation and email sequences, enhancing user experience and delivery reliability.

PROJECTS

carlosOS – Custom Unix Shell | C, Linux, Systems Programming

October 2024

- Implemented a minimal x86 bootloader and kernel with custom memory management and process scheduling in C/C++, tested using QEMU.
- Developed a Unix-style shell supporting pipelines, I/O redirection, and background job control, applying concepts from computer systems coursework.

Aggie Events | TypeScript, Next.js, React, Node.js

March 2025

- Built a full-stack event discovery platform with a responsive Next.js frontend and Node.js API, serving campus organizations and students.
- Optimized PostgreSQL schema, reducing p95 query latency by 40%, ensuring efficient data retrieval and user interactions.

ApplyEasy Job Automation Engine | n8n, OpenAI API, Google APIs

February 2025

- Architected the core automation engine for applyeasy.tech, orchestrating job scraping and LaTeX resume generation using n8n workflow primitives.
- Implemented reliable data pipelines processing over 100 job postings daily, enhancing the efficiency of the application process.

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, C/C++, Java, SQL

Frameworks: React, Next.js, FastAPI, Node.js, LangChain

Databases & Tools: PostgreSQL, Docker, Git, GitHub Actions, Linux
