EDUCATION

Texas A&M University

College Station, TX

Bachelor of Science in Computer Science; GPA: 3.8/4.0

May 2026

- Relevant Coursework: Software Engineering, Algorithms, Operating Systems, AI
- Completed writing-intensive coursework including specifications, user stories, retrospectives, and peer evaluations.

EXPERIENCE

AIPHRODITE

College Station, TX

Technical Lead & Full Stack / ML

Sep. 2024 – Present

- Architected FastAPI backend serving computer vision embeddings and outfit recommendations to 500+ wardrobe items, designing PostgreSQL schema with composite indexes reducing query latency by 40%.
- Led 6-person engineering team building Next.js/React frontend with Tailwind CSS, integrating real-time outfit recommendations via FastAPI backend and PostgreSQL.
- Developed RAG-powered AI fashion advisor using LangChain and OpenAI embeddings, improving click-through rate on recommendations by 25% in prototype testing.

applyeasy.tech

College Station, TX

Founder & Full-Stack Developer

January 2024 – Present

- Founded applyeasy.tech, a SaaS platform automating job applications, reducing manual application time by 75%.
- Built end-to-end job application automation pipeline using n8n, scraping 100+ jobs/day via Apify and filtering with OpenAI.
- Integrated Google Workspace APIs for automated document generation and email sequences, hosting compiled PDFs on GitHub for reliable delivery.

PROJECTS

carlosOS – Custom Unix Shell | C, Linux, Systems Programming

October 2024

- Implemented minimal x86 bootloader and kernel with custom memory management, process scheduling, and system call interface.
- Built userland shell supporting pipelines, I/O redirection, and background job control, applying concepts from computer systems coursework.

Aggie Events | TypeScript, Next.js, React, Tailwind CSS, Node.js, PostgreSQL

April 2025

- Built full-stack event discovery platform with a responsive Next.js frontend and Node.js API for campus organizations.
- Extended PostgreSQL schema for events, organizations, and user interactions, reducing p95 query latency by 40%.

ApplyEasy Job Automation Engine | n8n, OpenAI API, Apify, Google APIs, GitHub, LaTeX

June 2025

- Architected core automation engine for applyeasy.tech, orchestrating job scraping, LLM-based filtering, and LaTeX resume generation.
- Implemented reliable data pipelines with structured error handling, processing 100+ job postings daily.

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, C/C++, Java, SQL

Frameworks: React, Next.js, FastAPI, Node.js, LangChain

Databases & Tools: PostgreSQL, Docker, Git, GitHub Actions, Linux
