EDUCATION

Texas A&M University

College Station, TX

Bachelor of Science in Computer Science; GPA: 3.8/4.0

May 2026

- Relevant Coursework: Software Engineering, Algorithms, Operating Systems, AI
- Completed writing-intensive coursework including specifications, user stories, retrospectives, demos, and peer evaluations.

EXPERIENCE

AIPHRODITE

College Station, TX

Technical Lead & Full Stack / ML

Sep. 2024 – Present

- Architected FastAPI backend serving computer vision embeddings and outfit recommendations to 500+ wardrobe items; designed PostgreSQL schema with composite indexes reducing query latency by 40%.
- Built RESTful API endpoints for image tagging (category, color, pattern) achieving 87% classification accuracy; implemented efficient database queries with Prisma ORM.
- Containerized microservices with Docker and configured GitHub Actions CI/CD pipeline for automated testing and deployment.

applyeasy.tech

College Station, TX

Founder & Full-Stack Developer

January 2024 – Present

- Built end-to-end job application automation pipeline using n8n: scrapes 100+ jobs/day via Apify, filters with OpenAI, generates tailored LaTeX resumes, and sends personalized outreach emails.
- Designed fault-tolerant workflow orchestration with conditional branching, batch processing, structured logging, and retry logic; reduced silent failures by 90%.
- Integrated Google Workspace APIs (Slides, Sheets, Gmail) for automated document generation and email sequences; hosted compiled PDFs on GitHub for reliable delivery.

PROJECTS

carlosOS – Custom Unix Shell | C, Linux, Systems Programming

October 2024

- Implemented minimal x86 bootloader and kernel with custom memory management, process scheduling, and system call interface; developed in C/C++ with QEMU for testing.
- Designed basic process model with round-robin scheduler and IPC mechanisms; implemented fork, exec, pipe, and signal handling based on Unix semantics.

Aggie Events | TypeScript, Next.js, React, Tailwind CSS, Node.js, PostgreSQL, Docker

March 2024

- Built full-stack event discovery platform with responsive Next.js frontend, Node.js API, and PostgreSQL database serving campus organizations and students.
- Extended PostgreSQL schema for events, organizations, and user interactions; added composite indexes reducing p95 query latency by 40%.

ApplyEasy Job Automation Engine | n8n, OpenAI API, Apify, Google APIs, GitHub, LaTeX

June 2025

- Architected core automation engine for applyeasy.tech: orchestrated job scraping, LLM-based filtering, LaTeX resume generation, and email outreach using n8n workflow primitives.
- Implemented reliable data pipelines with Split in Batches, conditional branching, HTTP Request nodes, and structured error handling; processes 100+ job postings daily.

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, C/C++, Java, SQL

Frameworks: React, Next.js, FastAPI, Node.js, LangChain

Databases & Tools: PostgreSQL, Docker, Git, GitHub Actions, Linux
