EDUCATION

Texas A&M University

College Station, TX

Bachelor of Science in Computer Science; GPA: 3.8/4.0

May 2026

- Relevant Coursework: Software Engineering, Algorithms, Operating Systems, AI
- Completed writing-intensive coursework including specifications and user stories.

EXPERIENCE

AIPHRODITE

College Station, TX

Technical Lead & Full Stack / ML

Sep. 2024 – Present

- Architected FastAPI backend serving computer vision embeddings and outfit recommendations for 500+ wardrobe items; designed PostgreSQL schema with composite indexes reducing query latency by 40%.
- Built RESTful API endpoints for image tagging and classification achieving 87% accuracy; optimized database queries with Prisma ORM.
- Led a 6-person engineering team through agile sprints, reducing PR rework by 35% and improving collaboration.

applyeasy.tech

Remote

Founder & Full-Stack Developer

January 2025 – Present

- Developed an end-to-end job application automation pipeline using n8n, processing over 100 jobs daily and reducing manual application time by 75%.
- Integrated Google Workspace APIs for automated document generation and email sequences; hosted compiled PDFs on GitHub for reliable delivery.
- Founded the platform to automate job applications, increasing user satisfaction through AI-powered filtering and resume generation.

PROJECTS

carlosOS – Custom Unix Shell | C, Linux, Systems Programming

October 2024

- Implemented a minimal x86 bootloader and kernel with custom memory management and process scheduling using C/C++.
- Designed a userland shell supporting pipelines, I/O redirection, and background job control, tested with QEMU.

Aggie Events | TypeScript, Next.js, React, Tailwind CSS, Node.js, PostgreSQL

2023

- Built a full-stack event discovery platform with a responsive Next.js frontend and Node.js API, serving campus organizations.
- Optimized PostgreSQL schema and reduced p95 query latency by 40% through efficient indexing and query tuning.

ApplyEasy Job Automation Engine | n8n, OpenAI API, Apify, Google APIs, GitHub, LaTeX

2025

- Architected core automation engine orchestrating job scraping, filtering, LaTeX resume generation, and email outreach.
- Implemented reliable data pipelines processing 100+ job postings daily, using structured error handling and batch processing.

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, C/C++, Java, SQL

Frameworks: React, Next.js, FastAPI, Node.js, LangChain

Databases & Tools: PostgreSQL, Docker, Git, GitHub Actions, Linux
