

Carlos Luna-Peña

Computer Science @ Texas A&M

carlunpen@gmail.com | github.com/clmoon2 | linkedin.com/in/carlos-luna | applyeasy.tech

EDUCATION

Texas A&M University

College Station, TX

B.S. in Computer Science • Major GPA: 3.62/4.00

Aug. 2023 – Present

- Relevant Coursework: Software Engineering, Algorithms, Operating Systems, Artificial Intelligence, Computer Systems, Data Structures
- Completed writing-intensive coursework including specifications, user stories, retrospectives, demos, and peer evaluations

EXPERIENCE

AIPHRODITE (Aggies Create)

College Station, TX

Technical Lead & Full Stack / ML

Sep. 2024 – Present

- Led 6-person Agile team building AI-powered outfit recommender with LangChain and OpenAI; improved recommendation click-through rate by 25%
- Built RESTful APIs using FastAPI for image tagging and outfit suggestions; integrated Hugging Face models achieving 87% classification accuracy
- Containerized services with Docker and implemented CI/CD using GitHub Actions for consistent deployment and testing

applyeasy.tech

Remote

Founder & Full-Stack / Automation Engineer

2025

- Founded applyeasy.tech, a SaaS platform automating job search via n8n, AI filtering, resume generation, and email outreach; reduced manual time by 75%
- Developed job processing workflow using n8n and Apify handling 100+ roles/day; integrated OpenAI API for GPT-powered filtering and resume customization
- Connected Google Workspace APIs (Sheets, Slides, Gmail) for personalized documents and emails; deployed resumes via GitHub Actions automation

PROJECTS

carlosOS — C, C++, x86 Assembly, Make, QEMU, GDB

Ongoing

- Developing educational OS from scratch: bootloader, kernel, memory manager, syscalls, process scheduler; tested via QEMU and GDB
- Implemented Unix-style shell with pipelines, redirection, job control using fork/exec and IPC; applied OS and systems programming concepts

Aggie Events — TypeScript, Next.js, React, Node.js, PostgreSQL, Docker

Team of 8

- Built full-stack campus event platform with secure Google OAuth login, Postgres schema, and responsive design using Tailwind CSS
- Optimized database with composite indexes and query tuning; reduced p95 query latency by 40%

LaTeX Resume Builder & CLI/Action — TypeScript, Node.js, LaTeX, GitHub Actions

Open Source

- Created JSON-to-LaTeX tool generating ATS-optimized PDF resumes; packaged as CLI and GitHub Action for automation pipelines
- Designed extensible schema supporting resume sections and customization; used across applyeasy.tech workflows

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, C, C++, Java, SQL, Bash

Frameworks/Libraries: React.js, Next.js, React Native, Node.js, FastAPI, Tailwind CSS, LangChain

Databases: PostgreSQL, SQLite, Prisma

Tools/Platforms: GitHub, Docker, GitHub Actions, Linux, n8n, Apify, LaTeX, Google APIs, QEMU, GDB

Concepts: RESTful APIs, Agile Development, CI/CD, pair programming, automation, prompt engineering
