

# Carlos Luna-Peña

Computer Science @ Texas A&M University  
carlunpen@tamu.edu | github.com/clmoon2 | linkedin.com/in/carlunpen

## EDUCATION

### Texas A&M University

College Station, TX

*Bachelor of Science in Computer Science; GPA: 3.8/4.0*

*May 2026*

- Relevant Coursework: Software Engineering, Algorithms, Operating Systems, AI
- Completed writing-intensive coursework including specifications, user stories, retrospectives, demos, and peer evaluations.

## EXPERIENCE

### AIPHRODITE

College Station, TX

*Technical Lead & Full Stack / ML*

*Sep. 2024 – Present*

- Architected FastAPI backend serving computer vision embeddings and outfit recommendations to 500+ wardrobe items; designed PostgreSQL schema with composite indexes reducing query latency by 40%.
- Developed RAG-powered AI fashion advisor using LangChain and OpenAI embeddings over 500+ wardrobe items; improved click-through rate on recommendations by 25% in prototype testing.
- Led 6-person engineering team building Next.js/React frontend; integrated real-time outfit recommendations via FastAPI backend and PostgreSQL.

### applyeasy.tech

Remote

*Founder & Full-Stack Developer*

*January 2024 – Present*

- Built end-to-end job application automation pipeline using n8n: scrapes 100+ jobs/day via Apify, filters with OpenAI, generates tailored LaTeX resumes, and sends personalized outreach emails.
- Founded applyeasy.tech, a SaaS platform automating job applications, reducing manual application time by 75% with AI-powered filtering and resume generation.
- Implemented GPT-powered job relevance scoring using OpenAI API; designed prompts that accurately filter roles matching user preferences and qualifications.

## PROJECTS

### carlosOS – Custom Unix Shell | C, Linux, Systems Programming

October 2024

- Implemented minimal x86 bootloader and kernel with custom memory management, process scheduling, and system call interface.
- Built userland shell supporting pipelines, I/O redirection, and background job control; documented build system for reproducible cross-compilation.

### Aggie Events | TypeScript, Next.js, React, Tailwind CSS, Node.js, PostgreSQL

March 2025

- Built full-stack event discovery platform with 8-person team: responsive Next.js frontend, Node.js API, and PostgreSQL database serving campus organizations and students.
- Extended PostgreSQL schema for events, organizations, and user interactions; added composite indexes reducing p95 query latency by 40%.

### ApplyEasy Job Automation Engine | n8n, OpenAI API, Apify, Google APIs

June 2025

- Architected core automation engine for applyeasy.tech: orchestrated job scraping, LLM-based filtering, LaTeX resume generation, and email outreach using n8n workflow primitives.
- Implemented reliable data pipelines with structured error handling; processes 100+ job postings daily.

## TECHNICAL SKILLS

**Languages:** TypeScript, JavaScript, Python, C/C++, Java, SQL

**Frameworks:** React, Next.js, FastAPI, Node.js, LangChain

**Databases & Tools:** PostgreSQL, Docker, Git, GitHub Actions, Linux
