EDUCATION

Texas A&M University

College Station, TX

Bachelor of Science in Computer Science; GPA: 3.8/4.0

May 2026

- Relevant Coursework: Software Engineering, Algorithms, Operating Systems, AI
- Completed writing-intensive coursework including specifications and user stories.

EXPERIENCE

AIPHRODITE

College Station, TX

Technical Lead & Full Stack / ML

Sep. 2024 – Present

- Led a team of 6 engineers to develop an AI fashion advisor using LangChain and OpenAI, improving outfit recommendation click-through rates by 25%.
- Architected FastAPI backend serving computer vision embeddings, achieving 87% classification accuracy on clothing items and reducing query latency by 40% with optimized PostgreSQL schema.
- Containerized microservices using Docker and configured GitHub Actions CI/CD pipeline, streamlining deployment processes.

applyeasy.tech

College Station, TX

Founder & Full-Stack Developer

January 2024 – Present

- Founded a platform automating job applications, reducing manual application time by 75% with an end-to-end pipeline processing 100+ jobs/day.
- Built a React Native mobile app for real-time job application tracking, integrating OpenAI API for role filtering and personalized resume generation.
- Implemented Google Workspace APIs for automated document generation, enhancing email outreach efficiency and reliability.

PROJECTS

carlosOS – Custom Unix Shell | C, Linux, Systems Programming

October 2024

- Developed a Unix-style shell with process management, pipelines, and I/O redirection, applying concepts from computer systems coursework.
- Implemented process scheduling and IPC mechanisms, enhancing the educational OS with features like fork, exec, and signal handling.

Aggie Events | TypeScript, Next.js, React, Node.js, PostgreSQL

November 2024

- Built a full-stack event discovery platform with a responsive Next.js frontend and secure Google OAuth authentication.
- Optimized PostgreSQL schema and query performance, reducing p95 latency by 40% to improve user experience.

ApplyEasy Job Automation Engine | n8n, OpenAI API, Apify, Google APIs

December 2024

- Architected a core automation engine orchestrating job scraping, LLM-based filtering, and resume generation for applyeasy.tech.
- Implemented reliable data pipelines processing 100+ job postings daily, enhancing the efficiency of job application automation.

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, C/C++, Java, SQL

Frameworks: React, Next.js, FastAPI, Node.js, LangChain

Databases & Tools: PostgreSQL, Docker, Git, GitHub Actions, Linux
