EDUCATION

Texas A&M University

College Station, TX

Bachelor of Science in Computer Science; GPA: 3.8/4.0

May 2026

- Relevant Coursework: Software Engineering, Algorithms, Operating Systems, AI
- Completed writing-intensive coursework including specifications, user stories, retrospectives, demos, and peer evaluations.

EXPERIENCE

AIPHRODITE

College Station, TX

Technical Lead & Full Stack / ML

Sep. 2024 – Present

- Led a 6-person team to build a Next.js/React frontend for AI-powered fashion recommendations using LangChain and OpenAI embeddings on 500+ wardrobe items.
- Architected FastAPI backend serving computer vision embeddings with an 87% accuracy in image tagging, optimizing query latency by 40% through PostgreSQL schema enhancements.
- Integrated OpenAI Vision API for automated clothing tagging, reducing manual data entry time by 80%.

applyeasy.tech

College Station, TX

Founder & Full-Stack Developer

January 2024 – Present

- Developed a job application automation platform using n8n and OpenAI, reducing manual application time by 75% through automated resume generation and outreach.
- Designed fault-tolerant workflows with conditional branching and retry logic, minimizing silent failures by 90%.
- Built a React Native mobile app with real-time job monitoring and adjustable user preferences, enhancing user satisfaction among early adopters.

PROJECTS

carlosOS – Custom Unix Shell | C, Linux, Systems Programming

October 2024

- Implemented a Unix-style shell with process management, including fork/exec, pipelines, and I/O redirection, applying concepts from computer systems coursework.
- Developed a basic process model with round-robin scheduling and IPC mechanisms, integrating essential Unix semantics.

Aggie Events | TypeScript, Next.js, React, PostgreSQL

2025

- Created a full-stack event discovery platform with a responsive Next.js frontend and a PostgreSQL backend, improving query latency by 40% through schema optimization.
- Implemented Google OAuth authentication with secure session management and dynamic environment-based secrets handling.

ApplyEasy Job Automation Engine | n8n, OpenAI API, LaTeX

2025

- Architected a core automation engine for orchestrating job scraping, LLM-based filtering, and LaTeX resume generation, processing over 100 job postings daily.
- Implemented structured error handling and batch processing in n8n workflows, ensuring reliable data pipelines.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, C/C++, Java, SQL

Frameworks: React, Next.js, FastAPI, Node.js, LangChain

Databases & Tools: PostgreSQL, Docker, Git, GitHub Actions, Linux
