EDUCATION

Texas A&M University

College Station, TX

Bachelor of Science in Computer Science; GPA: 3.8/4.0

May 2026

- Relevant Coursework: Software Engineering, Algorithms, Operating Systems, AI
- Completed writing-intensive coursework including specifications and user stories

EXPERIENCE

AIPHRODITE

College Station, TX

Technical Lead & Full Stack / ML

Sep. 2024 – Present

- Led a 6-person team to develop a Next.js and React.js application, integrating AI-powered styling suggestions, improving user engagement by 25%.
- Architected FastAPI backend serving computer vision embeddings for 500+ wardrobe items, reducing query latency by 40% through optimized PostgreSQL schema.
- Implemented computer vision pipeline for clothing classification with 87% accuracy, using LangChain and OpenAI for enhanced feature extraction.

applyeasy.tech

College Station, TX

Founder & Full-Stack Developer

January 2024 – Present

- Developed an automation pipeline with n8n to process 100+ job applications daily; reduced manual application time by 75%.
- Built a React Native app for real-time job tracking, leveraging OpenAI API for role filtering, enhancing user experience with a mobile-first design.
- Integrated Google APIs for seamless document generation and outreach, ensuring reliable PDF delivery through GitHub-hosted systems.

PROJECTS

carlosOS – Custom Unix Shell | C, Linux, Systems Programming

October 2024

- Implemented a Unix-style shell with process management, pipelines, and I/O redirection, applying concepts from operating systems coursework.
- Developed memory management and process scheduling in C/C++, tested with QEMU for robust system performance.

Aggie Events | TypeScript, Next.js, PostgreSQL

March 2025

- Built a full-stack event discovery platform with responsive UI using Next.js and Tailwind CSS, improving campus community engagement.
- Optimized PostgreSQL schema reducing p95 query latency by 40%; implemented secure Google OAuth authentication.

ApplyEasy Job Automation Engine | n8n, OpenAI API, LaTeX

January 2025

- Architected automation engine for job application processing, integrating LLM-based filtering and LaTeX resume generation.
- Designed reliable data pipelines with structured logging and error handling, processing over 100 job postings daily.

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, C/C++, Java, SQL

Frameworks: React, Next.js, FastAPI, Node.js, LangChain

Databases & Tools: PostgreSQL, Docker, Git, GitHub Actions, Linux
