

Carlos Luna-Peña

Computer Science @ Texas A&M University

carlunpen@gmail.com | github.com/clmoon2 | linkedin.com/in/carlos-luna | applyeasy.tech

EDUCATION

Texas A&M University

College Station, TX

B.S. in Computer Science • Major GPA: 3.62/4.00

Aug. 2023 – Present

- Relevant Coursework: Software Engineering, Algorithms, Operating Systems, Artificial Intelligence, Data Structures, Computer Systems, Security
- Completed writing-intensive specifications, retrospectives, demos, and code evaluations

EXPERIENCE

AIPHRODITE (Aggies Create)

College Station, TX

Technical Lead & Full-Stack / ML

Sep. 2024 – Present

- Led 6-person team building full-stack fashion advisor using React.js, FastAPI, and PostgreSQL; structured sprint planning, code reviews, and CI/CD deployment
- Built RESTful APIs for image tagging and outfit recommendations with LangChain and OpenAI embeddings; improved classification accuracy to 87% and CTR by 25%
- Containerized services with Docker and configured GitHub Actions CI/CD pipelines to support team-wide continuous integration and deployment workflows

applyeasy.tech

Remote

Founder & Automation / Full-Stack Engineer

2025

- Built orchestration engine using n8n to automate 100+ job applications/day: job scraping, GPT-based filtering, LaTeX resume generation, and Gmail outreach
- Integrated Google Sheets, Slides, and Gmail APIs into automated workflows; reduced manual effort per job by 75% and improved delivery reliability
- Developed React Native mobile app for real-time status tracking and review; launched beta with early users collecting feedback to refine prompts and UX

PROJECTS

carlosOS • C, C++, x86 Assembly, QEMU, Make, GDB

Educational Operating System

- Building x86 OS from scratch: bootloader, kernel, system calls, and memory management tested via QEMU and GDB
- Implemented Unix-style shell with fork, exec, pipes, and process control for hands-on system programming experience

Aggie Events • Next.js, React.js, TypeScript, PostgreSQL, Docker, GitHub Actions

Campus Event Platform

- Built full-stack platform with Node.js backend and PostgreSQL; improved query latency by 40% via composite indexes
- Configured CI/CD pipelines with GitHub Actions for automated testing, linting, and deployment across monorepo

LaTeX Resume Builder & CLI/Action • Node.js, TypeScript, LaTeX, GitHub Actions

Developer Automation Tool

- Developed JSON-to-LaTeX CLI and GitHub Action to generate ATS-optimized resumes with structured artifacts and auto builds
- Published reusable tool integrated into applyeasy.tech for automated resume generation and artifact hosting

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, Java, C++, C, SQL, Bash

Frameworks/Libraries: React.js, Next.js, React Native, Node.js, FastAPI, Tailwind CSS, LangChain

Databases: PostgreSQL, Prisma ORM, SQLite

Tools/Platforms: GitHub, GitHub Actions, Docker, Linux, n8n, QEMU, GDB, LaTeX, OpenAI API, Google APIs, RESTful APIs
