

# Carlos Luna-Peña

Computer Science @ Texas A&M University  
carlunpen@tamu.edu | github.com/clmoon2 | linkedin.com/in/carlunpen

## EDUCATION

### Texas A&M University

College Station, TX

*Bachelor of Science in Computer Science; GPA: 3.8/4.0*

*May 2026*

- Relevant Coursework: Software Engineering, Algorithms, Operating Systems, AI
- Completed writing-intensive coursework including specifications and user stories.

## EXPERIENCE

### AIPHRODITE

College Station, TX

*Technical Lead & Full Stack / ML*

*Sep. 2024 – Present*

- Led a 6-person team developing a Next.js/React frontend and FastAPI backend, integrating real-time outfit recommendations via PostgreSQL, reducing query latency by 40%.
- Architected RESTful API endpoints for image tagging achieving 87% accuracy, optimizing database queries with Prisma ORM.
- Implemented RAG-powered AI fashion advisor using LangChain and OpenAI embeddings, enhancing recommendation click-through rates by 25%.

### applyeasy.tech

College Station, TX

*Founder & Full-Stack Developer*

*January 2024 – Present*

- Developed an end-to-end job application automation platform using n8n, reducing manual application time by 75% through automated role discovery and resume generation.
- Built React Native mobile app for real-time role reviews and application monitoring, iterating based on early user feedback for improved match quality.
- Integrated Google APIs for automated document generation, ensuring seamless PDF delivery via GitHub-hosted workflows.

## PROJECTS

### carlosOS – Custom Unix Shell | C, Linux, Systems Programming

October 2024

- Implemented a minimal x86 bootloader and kernel with custom memory management, process scheduling, and system call interface, using QEMU for testing.
- Designed a basic process model with round-robin scheduler and IPC mechanisms, implementing Unix-style commands and shell features.

### Aggie Events | TypeScript, Next.js, React, Tailwind CSS, Node.js, PostgreSQL

October 2023

- Developed a full-stack event discovery platform with an 8-person team, implementing a responsive Next.js frontend and Node.js API.
- Optimized PostgreSQL schema, reducing query latency by 40% through effective indexing and query tuning.

### ApplyEasy Job Automation Engine | n8n, OpenAI API, Apify, Google APIs, GitHub, LaTeX

January 2025

- Architected a core automation engine for job scraping, LLM-based filtering, and resume generation using n8n workflow primitives.
- Implemented reliable data pipelines processing 100+ job postings daily with structured error handling and efficient batch processing.

## TECHNICAL SKILLS

**Languages:** TypeScript, Python, JavaScript, C/C++, SQL

**Frameworks:** React.js, Next.js, FastAPI, Node.js, LangChain

**Databases & Tools:** PostgreSQL, Docker, Git, GitHub Actions, Linux
