EDUCATION

Texas A&M University

College Station, TX

Bachelor of Science in Computer Science; GPA: 3.8/4.0

May 2026

- Relevant Coursework: Software Engineering, Algorithms, Operating Systems, AI
- Completed writing-intensive coursework including specifications, user stories, and retrospectives.

EXPERIENCE

AIPHRODITE

College Station, TX

Technical Lead & Full Stack / ML

Sep. 2024 – Present

- Architected FastAPI backend serving computer vision embeddings and outfit recommendations to 500+ wardrobe items; designed PostgreSQL schema with composite indexes reducing query latency by 40%.
- Developed RAG-powered AI fashion advisor using LangChain and OpenAI embeddings; improved click-through rate on recommendations by 25% in prototype testing.
- Led 6-person engineering team building Next.js/React frontend with Tailwind CSS; integrated real-time outfit recommendations via FastAPI backend and PostgreSQL.

applyeasy.tech

College Station, TX

Founder & Full-Stack Developer

January 2024 – Present

- Built end-to-end job application automation pipeline using n8n; scrapes 100+ jobs/day via Apify, filters with OpenAI, generates LaTeX resumes, and sends personalized outreach emails.
- Founded applyeasy.tech, a SaaS platform automating job applications: AI-powered filtering and outreach sequencing—reducing manual application time by 75%.
- Implemented GPT-powered job relevance scoring using OpenAI API; designed prompts that accurately filter roles matching user preferences.

PROJECTS

carlosOS – Custom Unix Shell | C, Linux, Systems Programming

October 2024

- Building educational operating system from scratch in C/C++: bootloader, kernel, process scheduler, and system calls; testing with QEMU and GDB.
- Implemented Unix-style shell with process management (fork/exec), pipelines (pipe/dup2), and I/O redirection; applied concepts from computer systems coursework.

Aggie Events | TypeScript, Next.js, React, Tailwind CSS, Node.js, PostgreSQL

2024

- Built full-stack event discovery platform with 8-person team: responsive Next.js frontend, Node.js API, and PostgreSQL database serving campus organizations.
- Extended PostgreSQL schema; added composite indexes reducing p95 query latency by 40%.

ApplyEasy Job Automation Engine | n8n, OpenAI API, Apify, Google APIs, GitHub, LaTeX

2025

- Architected core automation engine for applyeasy.tech: orchestrated job scraping, LLM-based filtering, LaTeX resume generation, and email outreach.
- Implemented reliable data pipelines with structured error handling; processes 100+ job postings daily.

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, C/C++, Java, SQL

Frameworks: React, Next.js, FastAPI, Node.js, LangChain

Databases & Tools: PostgreSQL, Docker, Git, GitHub Actions, Linux
