EDUCATION

Texas A&M University

College Station, TX

Bachelor of Science in Computer Science; GPA: 3.8/4.0

May 2026

- Relevant Coursework: Software Engineering, Algorithms, Operating Systems, AI
- Completed writing-intensive coursework including specifications, user stories, and retrospectives.

EXPERIENCE

AIPHRODITE

College Station, TX

Technical Lead & Full Stack / ML

Sep. 2024 – Present

- Architected FastAPI backend to serve scalable software for computer vision embeddings and outfit recommendations, reducing query latency by 40% using PostgreSQL.
- Built RESTful API endpoints achieving 87% classification accuracy in image tagging; optimized database queries with Prisma ORM.
- Containerized microservices with Docker and established a CI/CD pipeline using GitHub Actions for automated testing and deployment.

applyeasy.tech

College Station, TX

Founder & Full-Stack Developer

January 2024 – Present

- Developed an automation pipeline using n8n to process 100+ jobs/day, generating tailored LaTeX resumes and sending outreach emails.
- Designed a fault-tolerant workflow with structured logging and retry logic; reduced silent failures by 90%.
- Integrated Google APIs for document generation, enhancing reliability and reducing manual application time by 75%.

PROJECTS

carlosOS – Custom Unix Shell | C, Linux, Systems Programming

October 2024

- Implemented a minimal x86 bootloader and kernel with custom memory management, process scheduling, and system call interface.
- Designed a basic process model including fork, exec, pipe, and signal handling, based on Unix semantics.

Aggie Events | TypeScript, Next.js, React, Tailwind CSS

2025

- Built a full-stack platform with responsive Next.js frontend and Node.js API; optimized PostgreSQL queries reducing latency by 40%.
- Implemented Google OAuth authentication with secure session management and environment-based secrets handling.

ApplyEasy Job Automation Engine | n8n, OpenAI API, Google APIs

2025

- Architected core automation engine for job scraping and LaTeX resume generation using n8n workflow primitives.
- Implemented reliable data pipelines processing 100+ job postings daily, enhancing efficiency and accuracy.

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, C/C++, Java, SQL

Frameworks: React, Next.js, FastAPI, Node.js, LangChain

Databases & Tools: PostgreSQL, Docker, Git, GitHub Actions, Linux
