EDUCATION

Texas A&M University

College Station, TX

Bachelor of Science in Computer Science; GPA: 3.8/4.0

May 2026

- Relevant Coursework: Software Engineering, Algorithms, Operating Systems, AI
- Completed writing-intensive coursework including specifications, user stories, retrospectives, demos, and peer evaluations.

EXPERIENCE

AIPHRODITE

College Station, TX

Technical Lead & Full Stack / ML

Sep. 2024 – Present

- Architected FastAPI backend serving computer vision embeddings and outfit recommendations for 500+ wardrobe items, reducing query latency by 40%.
- Led a 6-person engineering team building Next.js/React frontend with Tailwind CSS, integrating real-time outfit recommendations via FastAPI backend and PostgreSQL.
- Developed a RAG-powered AI fashion advisor using LangChain and OpenAI embeddings, improving recommendation click-through rate by 25%.

applyeasy.tech

College Station, TX

Founder & Full-Stack Developer

January 2024 – Present

- Built end-to-end job application automation pipeline using n8n, processing 100+ jobs/day and reducing manual application time by 75%.
- Founded applyeasy.tech, a SaaS platform automating job applications with AI-powered filtering, resume generation, and outreach sequencing.
- Implemented GPT-powered job relevance scoring using OpenAI API, designing prompts to accurately filter roles matching user preferences.

PROJECTS

carlosOS – Custom Unix Shell | C, Linux, Systems Programming

October 2024

- Implemented minimal x86 bootloader and kernel with custom memory management and process scheduling in C/C++, tested using QEMU.
- Designed a Unix-style shell supporting process management, pipelines, and I/O redirection, applying concepts from computer systems coursework.

Aggie Events | Next.js, React, Tailwind CSS, PostgreSQL

March 2025

- Built a full-stack event discovery platform for campus organizations with a responsive Next.js frontend and optimized PostgreSQL database.
- Implemented Google OAuth authentication, ensuring secure session management and reducing query latency by 40% with optimized indexing.

ApplyEasy Job Automation Engine | n8n, OpenAI API, Apify, Google APIs

April 2025

- Architected core automation engine for applyeasy.tech, orchestrating job scraping and LLM-based filtering using n8n workflow primitives.
- Designed LaTeX resume template system with JSON configuration, automating PDF compilation and GitHub hosting for reliable delivery.

TECHNICAL SKILLS

Languages: TypeScript, Python, JavaScript, C/C++, Java, SQL

Frameworks: React, Next.js, FastAPI, Node.js, LangChain

Databases & Tools: PostgreSQL, Docker, Git, GitHub Actions, Linux
