EDUCATION

Texas A&M University

College Station, TX

Bachelor of Science in Computer Science; GPA: 3.8/4.0

May 2026

- Relevant Coursework: Software Engineering, Algorithms, Operating Systems, AI
- Completed writing-intensive coursework including specifications, user stories, retrospectives, demos, and peer evaluations.

EXPERIENCE

AIPHRODITE

College Station, TX

Technical Lead & Full Stack / ML

Sep. 2024 – Present

- Led a 6-person team to develop a Next.js and React frontend, integrating real-time outfit recommendations via a FastAPI backend and PostgreSQL, enhancing user engagement.
- Architected FastAPI backend serving computer vision embeddings and outfit recommendations to 500+ wardrobe items; reduced query latency by 40% with optimized PostgreSQL schema.
- Developed AI fashion advisor using LangChain and OpenAI, achieving 87% classification accuracy in clothing tagging, improving user experience and click-through rate by 25%.

applyeasy.tech

College Station, TX

Founder & Full-Stack Developer

January 2024 – Present

- Founded applyeasy.tech, a SaaS platform automating job applications, reducing manual application time by 75% through AI-powered role discovery and resume generation.
- Built end-to-end job application automation pipeline using n8n, processing 100+ jobs/day, integrating Google APIs for document generation and streamlined email outreach.
- Implemented GPT-powered job relevance scoring, leveraging OpenAI API to filter roles based on user qualifications, enhancing user satisfaction and application success rate.

PROJECTS

carlosOS – Custom Unix Shell | C, Linux, Systems Programming

October 2024

- Developed a Unix-style shell with process management, I/O redirection, and pipelines, applying concepts from advanced computer systems coursework.
- Implemented custom memory management and process scheduling in C, providing a robust educational operating system environment for testing with QEMU and GDB.

Aggie Events | TypeScript, Next.js, React, Node.js, PostgreSQL

March 2024

- Built full-stack event discovery platform with responsive Next.js frontend and PostgreSQL, reducing query latency by 40% through efficient schema design.
- Implemented Google OAuth authentication and secure session management, enhancing user security and experience.

ApplyEasy Job Automation Engine | n8n, OpenAI API, Google APIs, LaTeX

February 2025

- Architected core automation engine orchestrating job scraping, LLM-based filtering, LaTeX resume generation, enabling processing of 100+ job postings daily.
- Designed LaTeX resume template system with JSON configuration for seamless PDF compilation and hosting on GitHub.

TECHNICAL SKILLS

Languages: TypeScript, Python, JavaScript, C/C++, SQL, Java

Frameworks: React.js, Next.js, FastAPI, Node.js, LangChain

Databases & Tools: PostgreSQL, Docker, Git, GitHub Actions, Linux
