EDUCATION

Texas A&M University

College Station, TX

Bachelor of Science in Computer Science; GPA: 3.8/4.0

May 2026

- Relevant Coursework: Software Engineering, Algorithms, Operating Systems, AI
- Completed writing-intensive coursework including specifications, user stories, and demos

EXPERIENCE

AIPHRODITE

College Station, TX

Technical Lead & Full Stack / ML

Sep. 2024 – Present

- Architected FastAPI backend serving computer vision embeddings and outfit recommendations to 500+ wardrobe items; designed PostgreSQL schema with composite indexes reducing query latency by 40%.
- Developed RAG-powered AI fashion advisor using LangChain and OpenAI embeddings; improved click-through rate on recommendations by 25%.
- Led 6-person engineering team building Next.js/React frontend with Tailwind CSS; integrated real-time outfit recommendations via FastAPI backend.

applyeasy.tech

College Station, TX

Founder & Full-Stack Developer

January 2024 – Present

- Built end-to-end job application automation pipeline using n8n: scrapes 100+ jobs/day via Apify, filters with OpenAI, generates tailored LaTeX resumes, and sends personalized outreach emails.
- Founded applyeasy.tech, a SaaS platform automating job applications: role discovery, AI-powered filtering, resume generation, and outreach sequencing—reducing manual application time by 75%.
- Integrated Google Workspace APIs for automated document generation and email sequences; hosted compiled PDFs on GitHub for reliable delivery.

PROJECTS

carlosOS – Custom Unix Shell | C, Linux, Systems Programming

October 2024

- Implementing minimal x86 bootloader and kernel with custom memory management, process scheduling, and system call interface; developing in C/C++ with QEMU for testing.
- Built userland shell supporting pipelines, I/O redirection, and background job control; documented build system for reproducible cross-compilation.

Aggie Events | TypeScript, Next.js, React, Tailwind CSS, Node.js

Date

- Built full-stack event discovery platform with 8-person team: responsive Next.js frontend, Node.js API, and PostgreSQL database.
- Implemented Google OAuth authentication with secure session cookies and CORS configuration.

ApplyEasy Job Automation Engine | n8n, OpenAI API, Apify, Google APIs

Date

- Architected core automation engine for applyeasy.tech: orchestrated job scraping, LLM-based filtering, LaTeX resume generation, and email outreach using n8n workflow primitives.
- Implemented reliable data pipelines with structured error handling; processes 100+ job postings daily.

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, C/C++, Java, SQL

Frameworks: React, Next.js, FastAPI, Node.js, LangChain

Databases & Tools: PostgreSQL, Docker, Git, GitHub Actions, Linux
