EDUCATION

Texas A&M University

College Station, TX

Bachelor of Science in Computer Science; GPA: 3.8/4.0

May 2026

- Relevant Coursework: Software Engineering, Algorithms, Operating Systems, AI
- Completed writing-intensive coursework including specifications and user stories

EXPERIENCE

AIPHRODITE

College Station, TX

Technical Lead & Full Stack / ML

Sep. 2024 – Present

- Architected FastAPI backend serving computer vision embeddings and outfit recommendations to 500+ wardrobe items, reducing query latency by 40%.
- Developed AI fashion advisor with LangChain and OpenAI, improving outfit recommendation click-through rates by 25%.
- Led 6-person team in building responsive Next.js/React frontend with real-time AI-powered styling suggestions, reducing manual data entry time by 80%.

applyeasy.tech

College Station, TX

Founder & Full-Stack Developer

January 2024 – Present

- Built job application automation pipeline using n8n, processing over 100 jobs/day with OpenAI filtering and LaTeX resume generation.
- Founded SaaS platform reducing manual application time by 75% through end-to-end automation and role discovery.
- Integrated Google APIs for automated document generation and email sequences, enhancing reliability and user engagement.

PROJECTS

carlosOS – Custom Unix Shell | C, Linux, Systems Programming

October 2024

- Implemented x86 bootloader and kernel with custom memory management and IPC mechanisms, applying Unix semantics.
- Built userland shell supporting pipelines, I/O redirection, and job control, ensuring compatibility with Unix systems.

Aggie Events | TypeScript, Next.js, React, PostgreSQL

2024

- Developed full-stack event discovery platform with secure Google OAuth integration and responsive UI components.
- Optimized PostgreSQL schema, reducing query latency by 40% through index tuning and query optimization.

ApplyEasy Job Automation Engine | n8n, OpenAI API, LaTeX

2025

- Architected core automation engine for job scraping and filtering, generating tailored LaTeX resumes and sending outreach emails.
- Implemented structured error handling and batch processing, ensuring reliable data pipeline processing of 100+ job postings daily.

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, C/C++, Java, SQL

Frameworks: React, Next.js, FastAPI, Node.js, LangChain

Databases & Tools: PostgreSQL, Docker, Git, GitHub Actions, Linux
