EDUCATION

Texas A&M University <i>Bachelor of Science in Computer Science; GPA: 3.8/4.0</i> - Relevant Coursework: Software Engineering, Algorithms, Operating Systems, AI - Completed writing-intensive coursework including specifications, user stories, and retrospectives.	College Station, TX <i>May 2026</i>
---	--

EXPERIENCE

AIPHRODITE <i>Technical Lead & Full Stack / ML</i> - Architected FastAPI backend for serving computer vision embeddings, reducing query latency by 40% through optimized PostgreSQL schema design. - Developed AI fashion advisor using LangChain and OpenAI API, improving recommendation click-through rates by 25%. - Led a 6-person team in building a Next.js/React frontend with real-time recommendations, integrating seamlessly with FastAPI backend.	College Station, TX <i>Sep. 2024 – Present</i>
applyeasy.tech <i>Founder & Full-Stack Developer</i> - Built job application automation pipeline using n8n, reducing manual application time by 75% with automated LaTeX resume generation. - Implemented GPT-powered job relevance scoring with OpenAI API, enhancing filtering accuracy for tailored job matching. - Developed a React Native mobile app for job application status tracking, providing real-time updates and interactive UI.	College Station, TX <i>January 2024 – Present</i>

PROJECTS

carlosOS – Custom Unix Shell <i>C, Linux, Systems Programming</i> - Implemented a Unix-style shell with process management and I/O redirection, applying concepts from computer systems coursework. - Built a basic process model with round-robin scheduler, enabling efficient task switching and resource management.	October 2024
Aggie Events <i>TypeScript, Next.js, PostgreSQL</i> - Built full-stack event discovery platform with a responsive Next.js frontend and optimized PostgreSQL schema. - Implemented secure Google OAuth authentication, enhancing user experience and data security.	April 2024
ApplyEasy Job Automation Engine <i>n8n, OpenAI API, LaTeX</i> - Architected core automation engine for orchestrating job scraping and LaTeX resume generation, processing 100+ job postings daily. - Implemented reliable data pipelines with structured error handling, improving processing reliability and efficiency.	March 2024

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, C/C++, SQL
Frameworks: React.js, Next.js, FastAPI, Node.js, LangChain
Databases & Tools: PostgreSQL, Docker, Git, GitHub Actions, Linux
