

Carlos Luna-Peña

Computer Science @ Texas A&M

carlunpen@gmail.com | GitHub: clmoon2 | LinkedIn: carlos-luna | Location: College Station, TX | applyeasy.tech

EDUCATION

Texas A&M University

College Station, TX

B.S. in Computer Science; Major GPA: 3.62

Aug. 2023 – Present

- Relevant Coursework: Software Engineering, Algorithms, Operating Systems, AI, Computer Security, Data Structures.
- Completed writing-intensive coursework: specifications, user stories, retrospectives, demos, evaluations.

EXPERIENCE

AIPHRODITE (Aggies Create)

College Station, TX

Technical Lead & Full Stack / ML

Sep. 2024 – Present

- Architected FastAPI backend serving computer vision embeddings and recommendations for 500+ items; designed PostgreSQL schema reducing query latency by 40%.
- Built RESTful API endpoints achieving 87% tagging accuracy; implemented Prisma ORM for database queries.
- Led 6-engineer team through sprints; reduced PR rework by 35% and demo-ready builds maintained.

applyeasy.tech

Remote

Founder & Full-Stack / Automation Engineer

2025

- Built end-to-end job application automation with n8n: processing 100+ jobs/day, filtering with OpenAI, generating LaTeX resumes, and email automation.
- Founded applyeasy.tech, automating job applications with a 75% reduction in manual time via a comprehensive SaaS platform.
- Developed GPT-powered job relevance scoring, enhancing filtering accuracy for user-specific job matching.

PROJECTS

carlosOS (Educational Operating System)

C, C++, x86 Assembly, QEMU

- Implemented x86 bootloader, kernel with memory management, and Unix-like shell using QEMU for testing and GDB debugging.
- Designed process model with round-robin scheduling; integrated IPC, fork/exec syscalls, and basic Unix shell features.

Aggie Events

TypeScript, Next.js, React, PostgreSQL

- Built full-stack event platform with secure Google OAuth, serving campus students, enhancing interaction with reduced query latency by 40%.
- Implemented responsive UI components and extended PostgreSQL schema for real-time events and interactions management.

ApplyEasy Job Automation Engine

n8n, Google APIs, OpenAI, LaTeX

- Architected automation engine orchestrating job scraping, filtering, resume generation, and email outreach using n8n primitives.
- Designed and automated LaTeX resume templates with JSON configuration; achieving PDF outputs hosted on GitHub.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, Java, C, C++

Frameworks/Libraries: React, Next.js, Tailwind CSS, FastAPI

Databases: PostgreSQL, SQLite, Prisma ORM

Tools/Platforms: Docker, n8n, Git, GitHub Actions, OpenAI API, LaTeX
